

Tools and Services Activity Summary

BNLBox

- Shutdown/recovery due to network maintenance went smoothly (no complaints)
 - Old test DNS aliases finally removed
- Working on integration with Jupyterhub

ELK

- globus01 transfer logs are going to new elastic stack
- All bnlbox monitoring is sent to new elastic stack
- syslog from log01 - working on logstash parsing by service (squid, named, ns-slaped etc.)
- Evaluating additional services (dCache? Tape system?) for monitoring

Digital Repositories

- EIC-Zenodo: Along with T.Ullrich verify/test the curation cycle for EIC zenodo community
- InvenioRDM project: First invenioRDM metadata community group, open to anybody interested/planning to contribute
<https://invenio-talk.web.cern.ch/t/metadata-interest-group/144>
- COVID-NLP: The stakeholder will work on the application to address issues identified by shorebreak testing and contact us once they are solved.

Belle CDB

- cdbweb monitor migrated to a HA reverse proxy infrastructure (120920), transparent intervention, no issues observed or reported.

Jira

- Recent uptick in individual account requests via RT (NPPS, STAR)
