

# General Services Update - 1/7/21

- Ssh gateways: atlasgw & rssh - new logins are blocked
  - Still a few users logged in (some weeks/months long sessions)
  - Will leave them be for a few more days but eventually shut them down
- Public website redesign in progress now
  - Preview will be ready by end of the month
  - New user & experiment specific info (Liaison editing access?)
    - Eliminate parallel/forked documentation maintained by the experiments
- Unified MFA with PrivacyIDEA
  - Transparent replacement for Keycloak MFA & linked to IPA (single OTP)
  - Separate presentation after the group reports
