

Indico @ BNL

- Operated by ITD, not SDCC
- Access via local (not federated) accounts, which can be created by **anyone with a valid email address**
 - Over 5,500 accounts (as of Feb. 2021)
 - 870+ (~15%) with @bnl.gov identities
 - 690+ (~13%) with other DOE lab identities
 - 1700+ (~31%) with .edu identities
 - 2270+ (~41%) with other identities (foreign, social media, etc)
 - 8997 categorized events
 - 8352 (~93%) within Physics
 - 251 (~3%) within NPP (other than Physics)
- Non-trivial process to enhance BNL Indico. If not done properly, it can break access to large numbers of people (BNL and non-BNL employees) associated to Physics Dept.
- A gradual migration process from local to federated access for authentication
- Separate (and complex) process to address authorization (ie, who has access to which areas)
- Process requires collaborative effort between SDCC and ITD
 - SDCC has created Indico instances to evaluate proposed upgrades
 - ITD has committed to provide “conditional” support for upgrades—some proposed changes may not be accepted due to manpower issues, cyber-security concerns and other considerations
