

Tools and Services Activity Summary

Digital repositories

InvenioRDM release testing activities

- Testing InvenioRDM V2 (March release) features record versioning.
- Testing InvenioRDM integration with SDCC infrastructure
 - InvenioRDM releases follow a containerized deployment, code distribution, and local software customization.
- In the process of enabling a testbed for users interested in helping test release features.

Indico

- A working group is being formed by Ian Ballantyne. This group will address security issues with Indico and future directions

BNL Box

- Following implementation of cyber-security's risk mitigation guidelines, the password requirement for link sharing in BNL Box has been removed

General Web Services

- Plan to create a public MatterMost channel for discussions and recommendations on the new website. For support (broken links, missing documentation, request for changes, etc), requests must be made through RT. Unlike RT, MatterMost cannot be used for requests for support, because it lacks a built-in tracking mechanism
- Several old sites were discontinued including web.racf, webdocs.racf, network.racf, dcache monitoring, the old URLs are now auto directed to the new URLs new sites.
- For monitoring tools & services, encourage to use central monitoring site under the URL <https://monitoring.sdcc.bnl.gov>
