

# Proposed Changes to Liaison Meeting Format

- Experiments and/or programs should give a monthly update on activities supported by SDCC.
  - Single slide is sufficient
  - Follow-up discussions to be scheduled as needed
- Includes this non-exhaustive list of experiments and/or programs:
  - sPHENIX – priority because of its current evolution in the NPP programs
  - STAR
  - PHENIX
  - EIC
  - US ATLAS
  - Belle-II
  - DUNE
  - CAD
  - CSI-operated programs (including LQCD, CMPMS, CFN, NNSA, SF, etc)
  - NSLS-II
  - CFN (if not included within CSI)
  - EEBN
  - Others (any omissions are not intentional and will be corrected when pointed out)?
- In keeping with current practice, staff members will still provide bi-weekly updates
