

editorial/project team update

Peter Steinberg, BNL/ ECCE biweekly meeting / 25 October 2021

ecce editorial/project team: Tom Cormier, Richard Milner, PAS

Editorial activity

- **Lots of activity in the ecce-editorial GitHub organizations (ecce-proposal & ecce-notes)**
 - Number of notes seems to have saturated
- **Review process ramping up**
 - Will take place on GitHub, commenting on released version of documents
 - *Email responses possible for special cases*
 - *Please make sure you have a GitHub account so you can participate in commenting, etc.*
 - Eager to get list of reviewers and trial “first” note for testing review process
 - *Expected from physics team ASAP*
- **Document DB posted as google sheet**
 - Useful and available for read access here
 - https://docs.google.com/spreadsheets/d/1Nuke_bu3tKajKQoNEF50UzSZk2lpTMqrs2Xk5KjaduE/edit?usp=sharing
 - Titles/names visible, but GitHub and overleaf are still restricted
- **Zenodo discussions ongoing at BNL**
 - Monthly discussions ongoing w/ SDCC with representatives from project, ATHENA and ECCE
 - InvenioRDM sandbox available for testing some newer features
 - Would be helpful for us to prepare a more formal set of requests from ECCE, beyond the more practical requirements from the proposal process

Overleaf status
