- rcf quick start

### INTT Drawings [edit | edit source]

- Stave
- End Rings
- CFC Inner Shell
- CFC Outer Shell
- Services Supports
- 3D configuration: ladders, HDI, Extender Cables, conversion Board, ROC

# INTT e-log @ BNL Server

<https://sphenix-intra.sdcc.bnl.gov/WWW/elog/INTT/>

The screenshot shows a web browser window displaying the INTT e-log interface. The browser's address bar shows the URL <https://sphenix-intra.sdcc.bnl.gov/WWW/elog/INTT/?id=2>. The page title is "ELOG INTT". The main content area displays "INTT Logbook, Page 1 of 1" and includes navigation links: "New | Find | Select | Import | Config | Last day | Help". Below this, there are filters for "Full | Summary | Threaded | Hide attachments" and search fields for "Author" and "Subject", with a "2 Entries" count. A table lists the log entries:

ID	Date	Author	Subject
2	Fri May 14 18:58:19 2021	Itaru	e-log test
1	Tue Feb 2 15:50:15 2021	Martin	test if I can make an entry here

Below the table, there is a text entry for ID 1: "yes...". At the bottom of the page, the version information "ELOG V3.1.4-3d7c366" is displayed.
