

Introduction to deep learning methods and their scientific applications (Block 7)

Friday, 6 August 2021 12:00 (2 hours)

Abstract: Deep learning is the backbone technology of the current wave of AI revolution that has changed people's daily lives from smart assistants, autonomous driving, to computational photography. In this talk, I will introduce some deep learning methods, their milestone breakthroughs, popular tools, and AI projects for science at BNL.

Presenter: REN, Yihui
