

IT Services Update - Liaisons - 5/27/21

- 1PB additional storage for STAR GPFS order has been placed
- NX: investigating double counting failed logins locking out users
 - Will retire old NX VMs June 1st (disabled more than 2 weeks ago)
- Mattermost minor version update next week (fix email template)
- Self-service OTP token deletion system almost ready: ~2 weeks
 - Next, will be testing MFA push to app (similar to Duo)
- Website: lots of updates made the last few weeks
 - New/improved search will be implemented soon, with other updates
 - Let us know if you see content needing updates (liaisons can edit also)
- Atlas dCache: testing deletions to find cause of slow rate: ~16Hz
 - Cleaner runs single threaded, completely sequentially through ~1k pools
 - Planning downtime soon to adjust config parameters (based on tests)
