- The **Organizing Committee is sharing the responsibility** of organizing weekly organizing meetings, bi-weekly meeting etc. on a rotating basis!

Regular meetings

- Regular WG updates & discussions are critical moving forward:
 - **Bi-weekly ATHENA meetings (June 10, 24):** Thursdays 11:00AM (EDT) - Brief 1-slide updates to entire ATHENA community with regular focus presentations

alternating with:

 - **Bi-weekly convener meetings (June 4, 18):** Fridays 11:30AM (EDT) - Brief 1-slide updates focusing on WG communications and concerns

Open Call for Collaboration Logo

Voting on the collaboration name has concluded and the winner is
ATHENA

(A Totally Hermetic Electron-Nucleus Apparatus)!

We would like to thank all who participated and submitted naming proposals!

Our next challenge is the collaboration LOGO! Please, submit your creative ideas by Tuesday, June 1st.

Submissions are accepted via email: yulia@jlab.org or

ATHENA

A Totally Hermetic Electron-Nucleus Apparatus

A new EIC experiment at IP6 at BNL

Welcome

Following the [site selection for construction of the U.S. Electron-Ion Collider research facility by the U.S. Department of Energy \(DOE\) in early 2020](#), the EIC Users Group led a year-long Yellow Report initiative to define the detector design criteria needed to realize the EIC physics described in the EIC White Paper, supported by the National Academy of Sciences. Using the Yellow Report as input, a Reference Detector concept was presented at the recently held DOE Critical Decision-1 review of the EIC.

A [Call for EIC Detector Proposals](#) has been issued by DOE & BNL/JLab on March 6, 2021, with an expected proposal submission deadline on December 1st, 2021. The EICUG community's strong preference for two detectors has led to multiple exciting detector initiatives. We invite all interested groups and consortia to come together to plan for a detector inspired by the Yellow Report detector concept based on a new central detector magnet up to 3T. We are actively planning to evolve this effort into a concrete detector proposal and start the process of forming a new collaboration for IP6. Please contact us if you wish to join us!
