

Tools and Services Activity Summary

Indico

- ITD stood up a test instance with federated access (BNL AD, SDCC and InCommon). SDCC and cyber will write a proposal to migrate from local to federated accounts and seek BHSO approval.
- CERN upgraded to Indico v3.0 this week, but not yet publicly released. When released, it will open up a host of potential activities on authorization issues (more information at future meetings).

Digital repositories

- Participation in the InvenioRDM partners meeting; Authentication - SSO is one of the major Invenio V4 release features

General Web Services

- 6/8 Tue: Major upgrade on proxies for Federated IdPs is now complete, addressing bugs and security issues.
