

# IT Services Update - Liaison - 6/24/21

- NX: was upgraded to version 7 this morning
  - GNOME desktop option was added recently also
- Mattermost: testing federated login for conference
  - We plan to enable email notifications next week
- Cooling(6/15): 3 RHEV hypervisors shutdown (~70VMs)
- OTP self service ready for all users next week:
  - <https://account.sdcc.bnl.gov/selfservice>
- Website: fixed internal search (2 chars & missing docs)
- CVMFS: improved monitoring (Nagios)
- Testing new VOMS client libraries and services for OSG/WLCG effort to migrate from x509 to IAM token-based auth
- dCache: ATLAS central DDM has increased their deletion rate for BNL (2 → 10 parallel threads)
  - also fixed some network config problems that were causing instabilities in the internal dCache system communications
- Testing Ceph RDB storage pool for dCache
