

Dear all,

Here is the minutes from today's meeting. Please make doodle entry for the meeting time schedule.

o Taiwan Assembly Status <Cheng-Wei>

- **Cheng-Wei** should use calibrated BNL torque screw because it is strictly calibrated. If you use alternative screw, make sure it is cross calibrated with the BNL one.
- **Cheng-Wei** continue gluing in Taiwan, make sure the glue does not exceed the flat plane level.
- **Cheng-Wei** continues classification task at NCU.

o Readbacker and Source Test Development in NWU <Takashi>

- There are some difficulties found in the first operation attempt and thus the room for the improvement. **BNL** and **Taiwan** lab should learn from NWU's experiences.
- Power cable of the motor for the source test fixture is not sufficiently long. **Itaru** look for extension.
- Need to pay attention in cable handling of the trigger scintillator. It may interfere with the ladder, so pay special attention. Need to guide the cable well.

o Wave Form Analysis <itaru>

- **Itaru** contact with Jin to ask the solution to reset bad chips for FVTX operation.
- Try to increase latch command multiple times before DAQ start in **NWU/RIKEN** standalone, to see if it helps to reduce the frequency of the half entry issue.

o LV System & grounding Review <Rachid>

- Trying to arrange in the next two to three weeks.
- Readout review 21st dress rehearsal 28 review.

Best Regards,

-itaru
