

# Summary of activity

- DIS reconstruction analysis module
  - Run reconstruction directly on DSTs
  - Starting with lepton reconstruction (add JB, DA methods later)
  - Some issues reading DSTs (trying to get input from Jin)
  - Preliminary results at Software Workshop tomorrow?
- $A_1^p$  and  $A_1^n$ 
  - Dien will give summary of status and open tasks next week
- Background
  - Can begin preliminary background study with “single-electron” and “single-pion” simulations
  - Pending analysis modules
