

Tools and Services Activity Summary

Overleaf

- Created an Overleaf account to manage licenses. Expect to have licenses available for users this month.

DocDB

- Creating a DocDB instance at the SDCC for sPHENIX. To improve reliability, we plan to transfer the instance on the Physics cluster to SDCC later this month.

General Web Services

- Met with Charity Plata (CSI) a couple of times in the past ~2 weeks to discuss layout and organization of the new website. She will work with SDCC staff to improve the website and documentation.
- GPFs client upgrade on sPhenix web backends on Jul 7th, sPhenix-intra website resumed operational.
