

Diffraction and Tagging WG Update

- Second round test (20k events) has been processed at JLab.
 - Analyzers are checking and giving feedback
 - No 50 cm shift yet, but Far Forward coordinates have been flipped
- Third round to launch soon
- Far forward evaluator to be finished by the end of the week
 - Not used by analyzers, who have written their own plugins
- Axel is working on generating SARTRE tables for Zr nuclei
