

Tools and Services Activity Summary

Overleaf

- So far ~67 licenses have been granted to various organizations (mainly Physics NP and CSI). Please inform your PHENIX, STAR and sPHENIX collaborators about the availability of Overleaf at BNL. Other Physics groups and non-NPP groups can inquire about availability too.
- Cloud service approval request form submitted to cyber

General Web Services

- The staging system for USATLAS site is nearly complete, except few bugs and issues require continuing effort to work with the vendor (DataArt), it will be released to the user community for further QA then create the final production system for the site. Continuous effort will be necessary for future improvement, maintenance, operation as a long term commitment.
- Major upgrade on the backend system for <https://phonebook.sdcc.bnl.gov> was completed on Sep 1st for NPPS, resolved issues brought from major PHP version change v5->v7 and underlying Apache version changes. Continuous effort will be required for full integration with the authentication system for the site.
- SDCC meets with Charity Plata on a regular basis to obtain feedback on the layout and organization of the new SDCC website. She also provides feedback on our updated facility documentation, with a focus on clarity and readability.
