Tools and Services Activity Summary

DocDB
- Working on delivering a SDCC-operated DocDB instance to sPHENIX, including a KeyCloak authenticated web front-end.
    - issues with putting sso/keycloak on the front-end
    - will deliver to sPHENIX with basic auth for now as we troubleshoot

BNLBox
- (update from June 24 announcement) Beginning in FY22, there will be charges for this service. The rate is being discussed now, and we will inform users later this month.

General Web Services

- SDCC meets regularly with Charity Plata to update facility documentation. She has already provided feedback on new website layout and organization, as well as on documentation about BNLBox, Jupyter, NX and new user accounts.
- Met last week with DataArt and USATLAS management and agreed on the direction of activities for the new USATLAS website among the participants. It is estimated that the new website will be available on or about Oct. 1st.
- Issues with DNS name solving and conduit situation w/ NSLS2 reverse proxies have been "resolved". Several NSLS2 websites have been moved from SDCC to dedicated LS2 proxies on 9/14(Mon), remaining NSLS2 sites (~12) will continue to be moved once timeline is decided
