

Tools and Services Activity Summary

DocDB

- A new DocDB instance has been deployed for sPhenix, previous data has been transferred from Physics cluster to the new instance, received positive feedback from sPhenix users, it's now near completion.

ATLAS dCache support

dCache QOS/Pre-production

- Integrating ELK monitoring for billingDB
- Upgraded to dCache 7.2.1 provides new features, i.e, quota management

General Web Services

- SDCC meets regularly with Charity Plata to update facility documentation. Group leaders have begun to receive edited copy from Charity. The responsibility now falls within the groups for content to be updated and entered into Drupal. Charity is working on the tranche of documentation sent to her following Tuesday's meeting. We are beginning to discuss matters of organization and improvements to information architecture with Charity's feedback as well.
- Researching and testing a new Redirect module for the SDCC website. This will assist in pointing our users to the content they're looking for and away from bad or outdated links.
- USATLAS site: DataArt is in the process of implementing and testing the roles requested by ATLAS users. Further changes will be imported to SDCC staging site, staff will review and open the site to users for further QA
- Certificates for domain names @sdcc.bnl.gov, @rcf.bnl.gov, @racf.bnl.gov have been renewed (Jason,JD) and mostly replaced throughout the facility, please report any observed issues
