IT Services Update: 12/16/21

Federated Jupyter: update/add new field to LDAP
- Aliasing multiple IDs, e.g. SDCCEPPNs: list,of,user,eppns

B725 RHEV: upcoming reboot of all campus-side VMs
- A few user (csshXX, nxcampus01) & internal systems
- New IPs reserved, need to update conduits (CSMIS broken)
- 1 NetApp NFS setup (to be tested and added to RHEV)
  - 2nd unit is having problems, support has been contacted

rftpexp retirement (sftp replacements available)
- Plan to retire at the end of January
- Finishing cftp config, then will retire astroftp & rcf3 also

AFS: Read access change
- Restart is not required (as originally thought)
- Changes implemented for ATLAS, to be done for RHIC early next week
  - Followed by removing anonymous access week of January 10
    - Removing "system:anyuser rl" on root of cells (RHIC+ATLAS)
    - Replace with BNL network based, unauthenticated rl ACL
    - Clients external to BNL will need to klog even for read access

Belle II Rucio client CA/CRL errors mitigated
- Scheduled httpd restart after CRL refresh every 6 hours

Belle II Rucio database tables repartitioned to separate historical record storage

Atlas dCache: working on ENDIT plugin
