IT Services Update - Liaison - 1/6/22

- NX confirmed MFA login error bug - testing patch
- Federated Jupyter: ready for initial production use
- B725 RHEV: reboot of all campus VMs this month
  - A few user (csshXX, nxcampus01) & few internal systems
  - New IPs reserved, waiting for conduits to be updated
  - Hypervisors in use, still need to test and put storage into use
- rftpexp retirement (sftp replacements available)
  - Plan to retire at the end of January
  - Finishing cftp config, then will retire astroftp & rcf3 also
- AFS: Read access changed last month
  - Removed "system:anyuser rl" on root of cells (RHIC+ATLAS)
  - Replaced with BNL network unauthenticated rl ACL
  - External clients will need to klog for group based read access
- phenix internal website cleanup
- CVMFS was upgraded: 2.8 → 2.9
- Atlas dCache: working on ENDIT HSM plugin
