

ECCE Proposal Computing Publications

Joe Osborn
February 2, 2021

Publication Policy

- Steering Committee announced publication policy of ECCE notes/documents etc.
- Computing group has three notes that could be considered:
 - ecce-note-comp-2021-01 - Computing plan
 - ecce-note-comp-2021-02 - Software and simulation
 - ecce-note-comp-2021-03 - AI assisted design
- We need to inform the SC ASAP about our intent to publish any of these
 - I assume 2021-03 is under the purview of the AI working group, so I will focus on notes 01 and 02

Author Policy

- Two main options for author policy
 - Alphabetical by ECCE collaborator last name
 - Primary contributors first, followed by alphabetical listing of all remaining collaborators
- Alternatives will be considered by SC
 - Was suggested that computing plan may warrant a condensed author list only

Discussion

- What, if any, documents should be considered for publication? What forum should they be published (e.g. arXiv, or peer reviewed submission)?
 - My (personal) opinion is that the computing plan (note-01) warrants publication, while the software and simulation (note-02) is more of a “what we did” and is better suited as an internal note
 - Thoughts? Disagreement?
- What do we need to do to prepare documents for publication?
- Other questions and/or items of discussion on this topic?
