

SIDIS status/plans

- **Current Activities**

- Finalizing full simulations
- Finalize binning and study impact on unpolarized TMDs and Sivers

- **Future Activities:**

- Study kinematic reconstruction for SIDIS
- Study Radiative corrections for SIDIS

- **Orthogonal**

- Study optimal operating points for the SIDIS program

- **Available Workforce**

- At this point mainly low level follow up activity by people involved in the proposal
- Sufficient in the transition period
