

Services and Tools Activity Summary

Storage / dCache support ([RT support](#))

- **ATLAS**
 - Preparation for the coming tape challenge: Data-taking mode (write) during the 3rd week of March, and after-data-taking mode (read) during the 4th week of March.
 - New tape interface ([dcache-endit-provider](#), [endit-hpss](#) 0.0.4) widely deployed for staging on datatape
 - Writing/Reading to new tape drives/libraries through a commissioning environment
 - Data rebalancing (HW retirements, Q2 resource delivery)
 - Consistency checks between Rucio, dCache and tape (HPSS)
 - Corrective action plan being defined
- **BELLE II**
 - WLCG Storage Resource Reporting (SRR) deployed
 - Issue with the SRR native functionality from dCache

Data management ([RT support](#))

- Rucio sPHENIX:
 - Rucio Instance configured for production use case
 - Discussion on namespace and naming convention
 - Rucio clients on cvmfs
 - Pending integration with the PanDA server@cern

General Web Services

- US-ATLAS([RT support](#)):
 - Theme changes for US-ATLAS website
 - Supporting Louis in updating and maintenance of site in preparation for 4/1 launch date
