

Results of Voting for Detector-1 Collaboration Name

Detector-1 Steering Committee

Silvia Dalla Torre, Or Hen, Tanja Horn, John Lajoie, and Bernd Surrow

Why?

- The generic “Detector-1” name is unsatisfying to many
- We saw this as an opportunity to continue to build a new identity
- It’s kind of fun...

Collaboration Names

- Names solicited June 24th - July 5th
 - 29 total suggestions

D1

ELECTRA (For: ELECTRon-A) --> "Electra is the goddess of stormy clouds, which draw their moisture up from the sea. They are charged with lightening and form around islands near the summits of mountains."

ELEIDA (ELEctron Ion Detector Apparatus) (name Eleida means "Rare beauty")

IONE (ION Electron collider detector) (Greek name - means Violet (Flower); name of a sea nymph)

ePIC = electronProton/Ion collisions

DISNEI - Deep Inelastic Scattering with a New Experimental Instrument

SMILE - Symmetrical Machine for Ion-Lepton Experiments

ACE - Accelerator that Collides Electron

ACE – Athena, Core & ECCE

EICD1

DEICE - Dedicated Electron-Ion Collider Experiment

PEIC Detector - Proto Electron Ion Collider Detector

QCDiNN - Quantum ChromoDynamics in Nucleons and Nuclei.

GAIUS - General Apparatus for Investigating Unresolved Substructures

BRIGHID - Broad Rapidity Incorporated, General Hermetic Integrating Detector

STARBUCK - System for Tracking Across Rapidity for the Benefit of Understanding Collision Kinematics

ORION - Overall Rapidity Instrument for Observing Nucleons

AHED - A Hermetic EIC Detector

GENIUS-I - General Eic Nuclear Investigator to study the Unusual Strong Interaction

GROUND-0 - Grand Research Of nUcleons & Nuclei Detector-0

ETTORE - Experiment for Tomography Through Observation of Recoil at EIC

DANTE - Detector Apparatus for Nuclear Tomography at EIC

AL DENTE - Asymmetric Large DEtector for Nuclear Tomography Experiments

AHEAD - A Hermetic EIC Advanced Detector

EPIC - Electron Proton and Ion Collider experiment

SETE - Solenoidal Electron Tracker for EIC

ADEPT - Advanced Discovery Electron Proton Tracker

HEART – Hadron Electron Advanced Reconstruction Tool

GOOBER – Groundbreaking Observer Of Broadly Energetic

Ranges

Detector-1 Contact Information

- Distributed to institutional representatives
 - Will be used to seed collaboration phonebook
 - Used to regulate voting for collaboration name
 - Individuals can also fill out the form – but coordinate with your rep!
 - Inst. reps – I can send you a list of registered people from your institution
 - **Form remains open!**
- <https://forms.gle/PhykTXYMRyW9GRc19>

509 unique contacts (first round)
526 unique contacts (second round)

Collaboration Name Voting:

- First Round:
 - Fri July 8th through July 15th (5PM EDT)
 - Voting extended to July 16th (noon EDT)
 - Mainly to allow time for people registering their contact information minutes before the deadline
- Main issues in first round voting:
 - Incomplete contact information; confusion from individual collaborators
 - Communication about procedure, deadlines
 - Qualtrics voting emails lost
 - This is always a problem – Qualtrics emails tend to get marked as spam, especially by labs
 - Managed to address all issues brought to my attention by close of voting

12:29

Please select your preference for the Detector-1 Collaboration name.

The top three from this first-round of voting will move on to a second round.

☐ DI

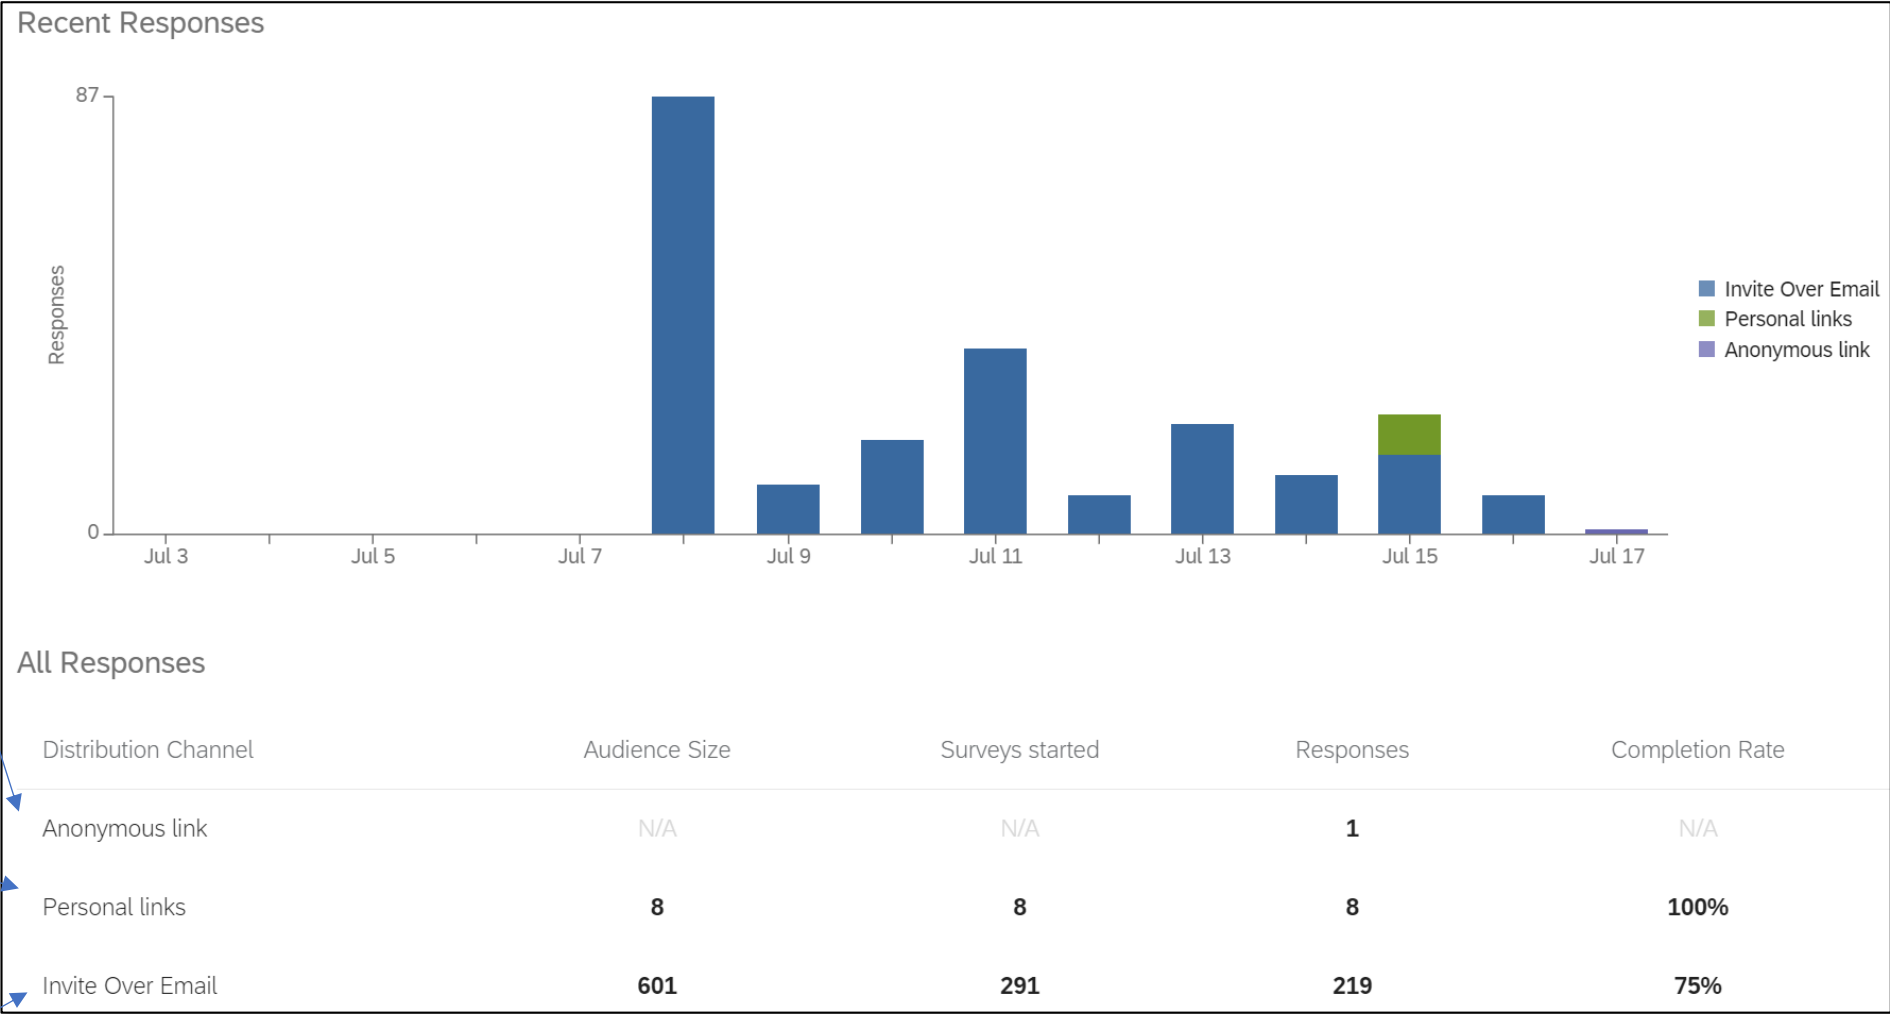

☐ ELECTRA (For: ELECTRON-A) --> "Electra is the goddess of stormy clouds, which draw their moisture up from the sea. They are charged with lightening and form around islands near the summits of mountains."

☐ ELEIDA - ELEctron Ion Detector Apparatus (name Eleida means " Rare beauty")

☐ IONE - ION Electron collider detector (Greek name - means Violet (Flower); name of a sea nymph)

☐ ePIC - electronProton/Ion collisions

Results from First Round

228 total votes cast

Exactly three people thought this
was a good idea...

Results from First Round

- The following names advanced to the second round:
 - **EPIC** - Electron Proton and Ion Collider experiment
 - $49/228 = 21\%$
 - **ELECTRA** (For: ELECTRon-A) --> "Electra is the goddess of stormy clouds, which draw their moisture up from the sea. They are charged with lightening and form around islands near the summits of mountains."
 - $34/228 = 15\%$
 - **ELEIDA** - ELEctron Ion Detector Apparatus (name Eleida means "Rare beauty")
 - $28/228 = 12\%$
 - **D1**
 - $25/228 = 11\%$

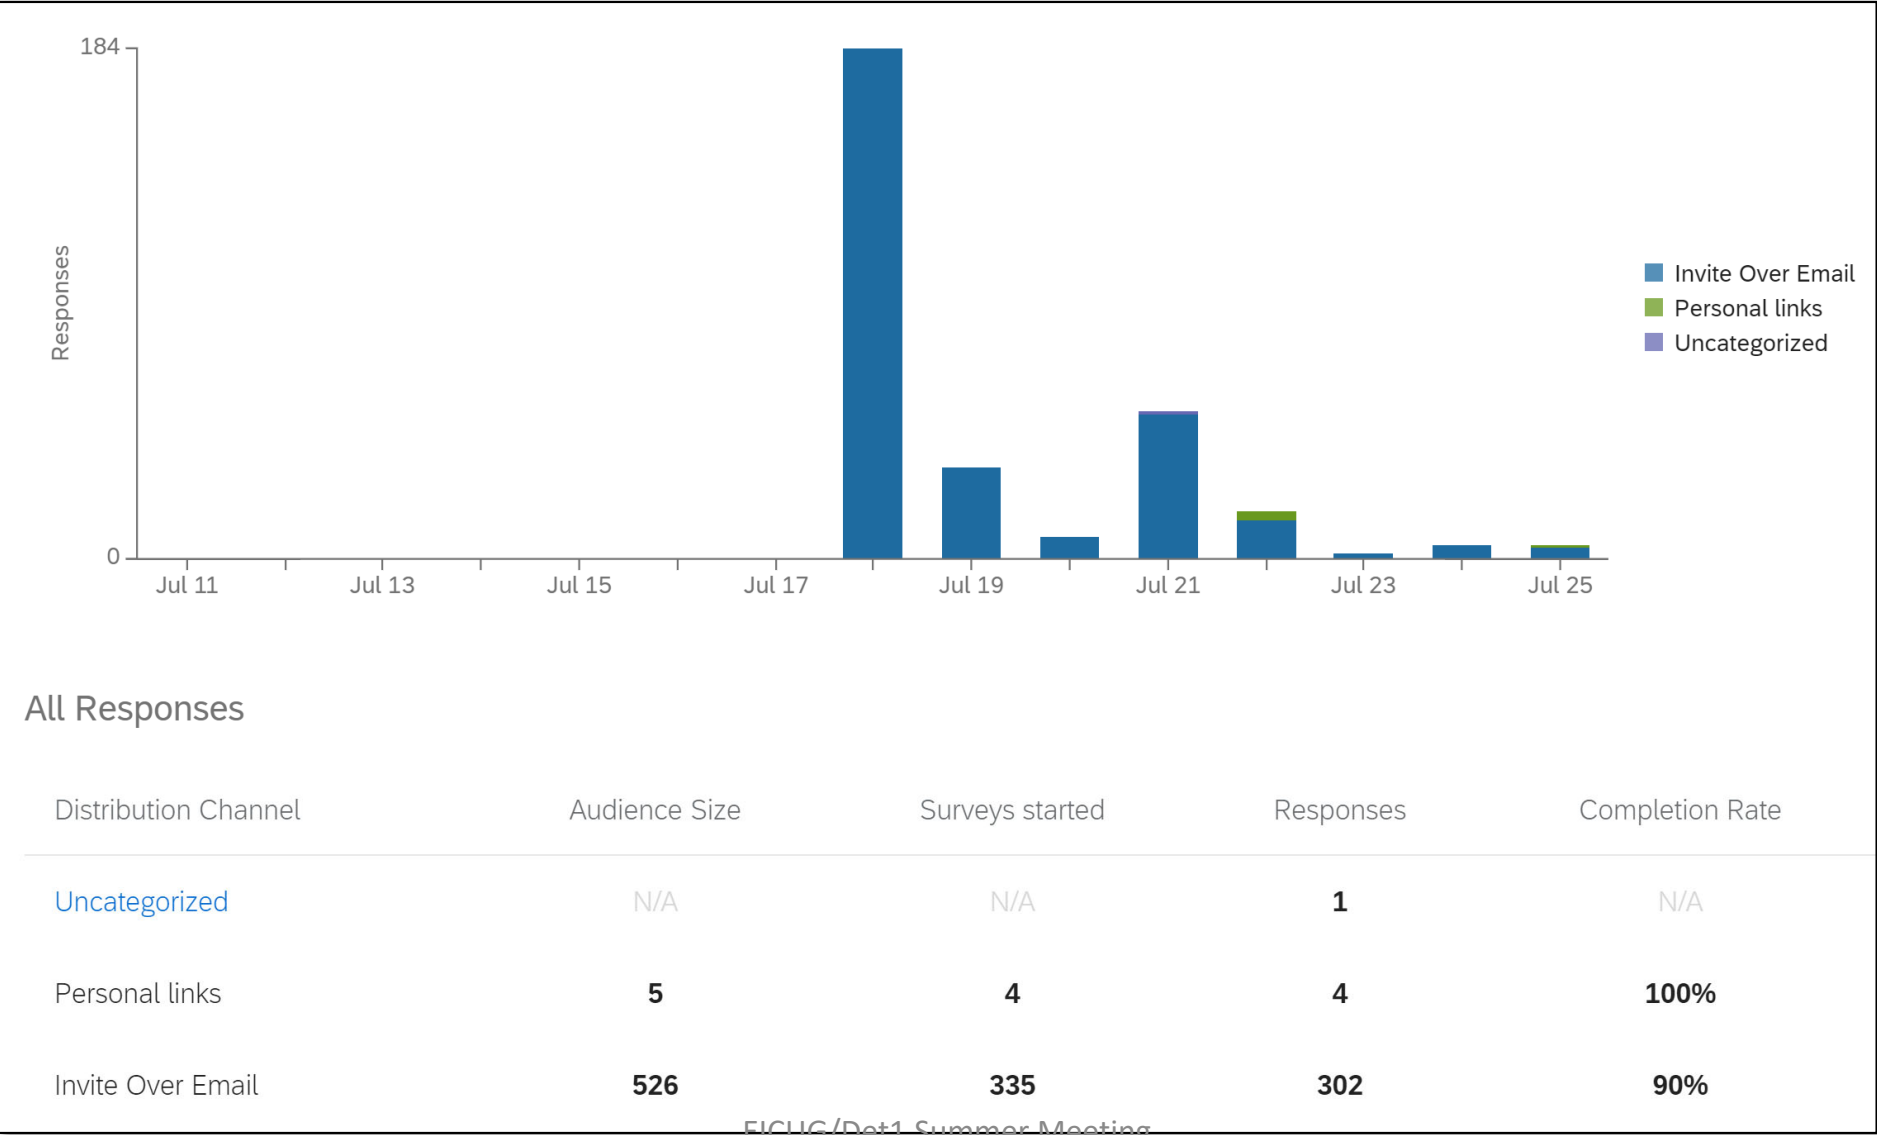

Second Round Voting:

- Second Round:
 - **Mon July 17th through July 25th (5PM EDT)**
 - Ended on time
- Voting was smoother this time:
 - Had a full, vetted contact list
 - Still had to handle some manual additions

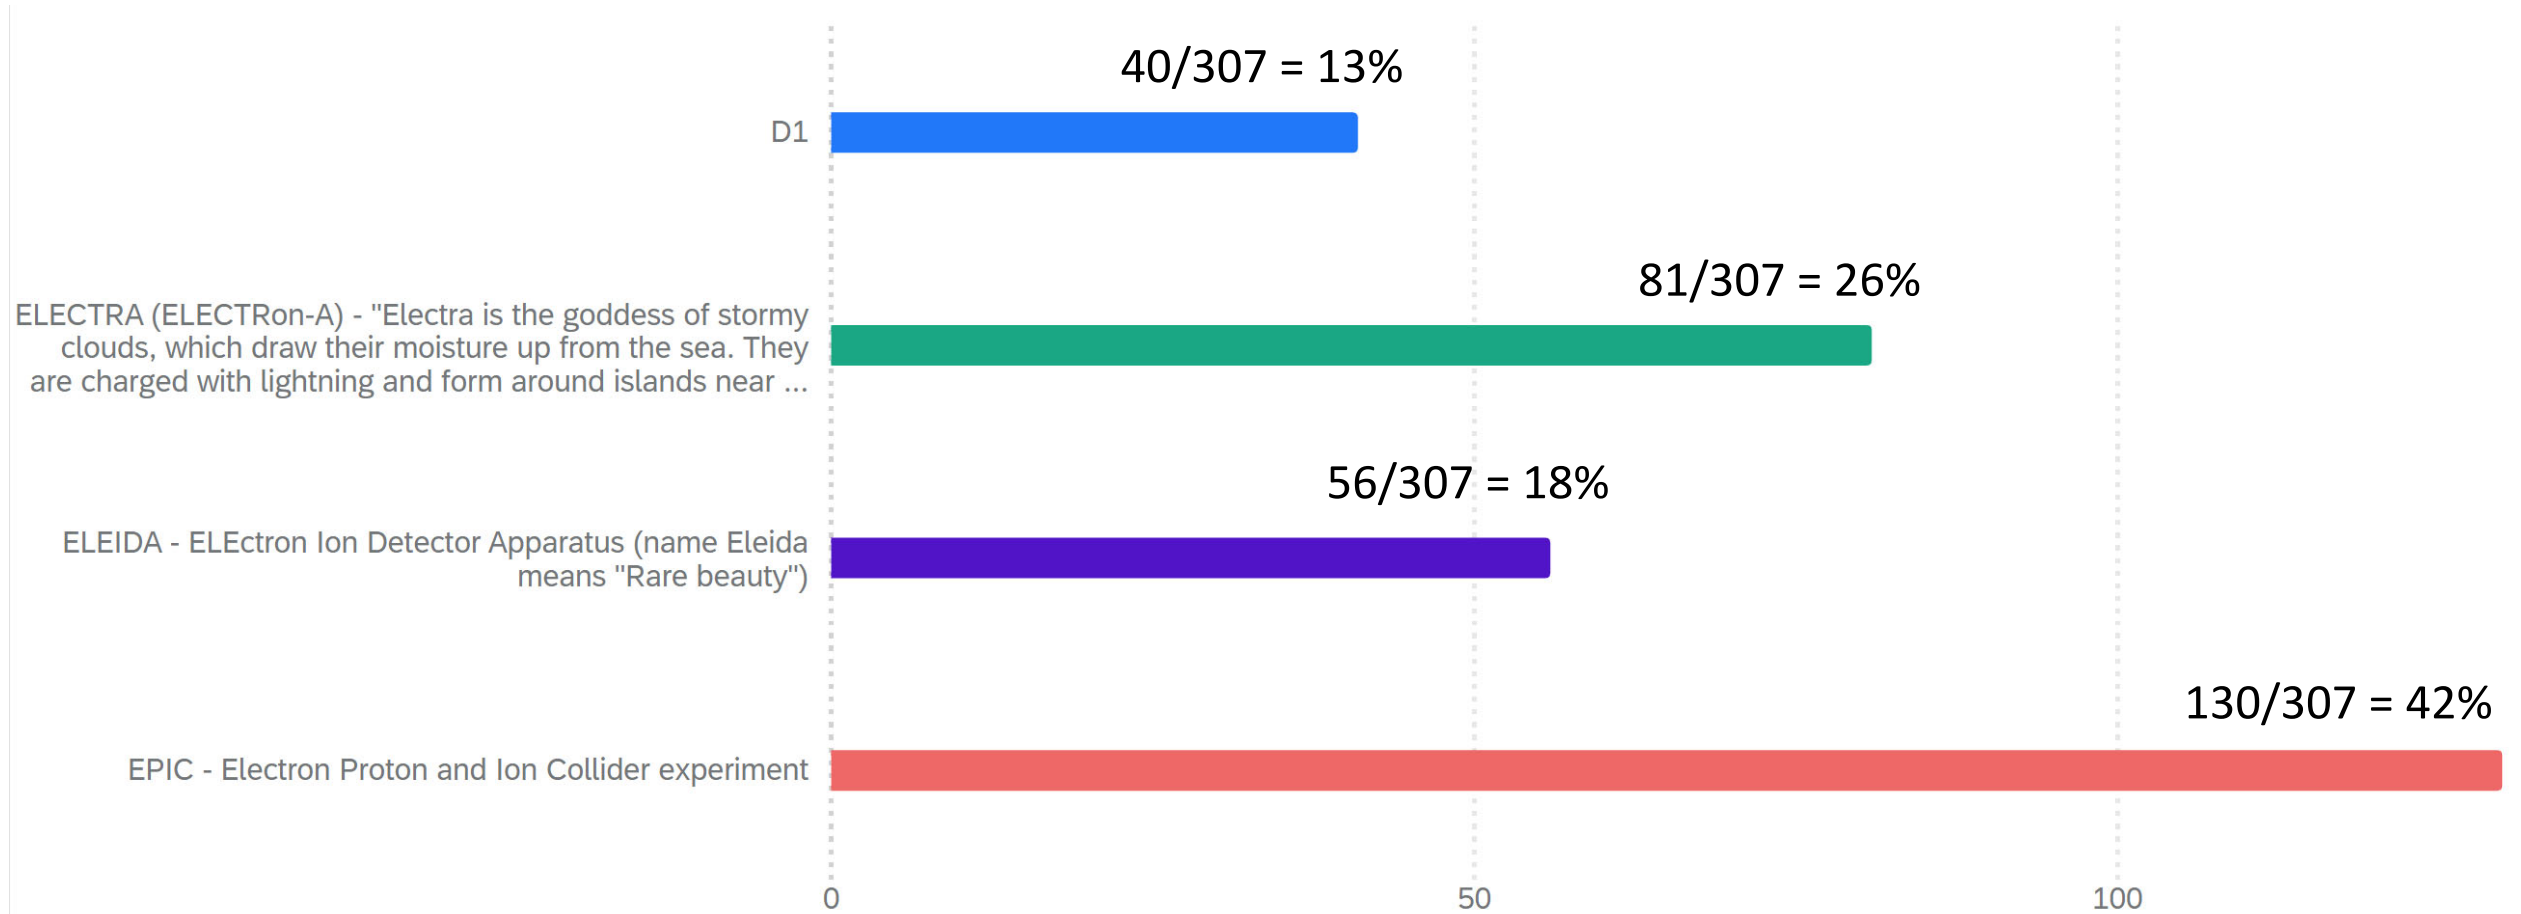

Results of the Second Round Voting

307 total responses (58%)

Results of the Second Round Voting

Discussion

- EPIC is the clear favorite in the second round voting

Name	First Round %	Second Round %
EPIC	21	42
ELECTRA	15	26
ELEIDA	12	18
D1	11	13
