

# Summary of ENDF library work

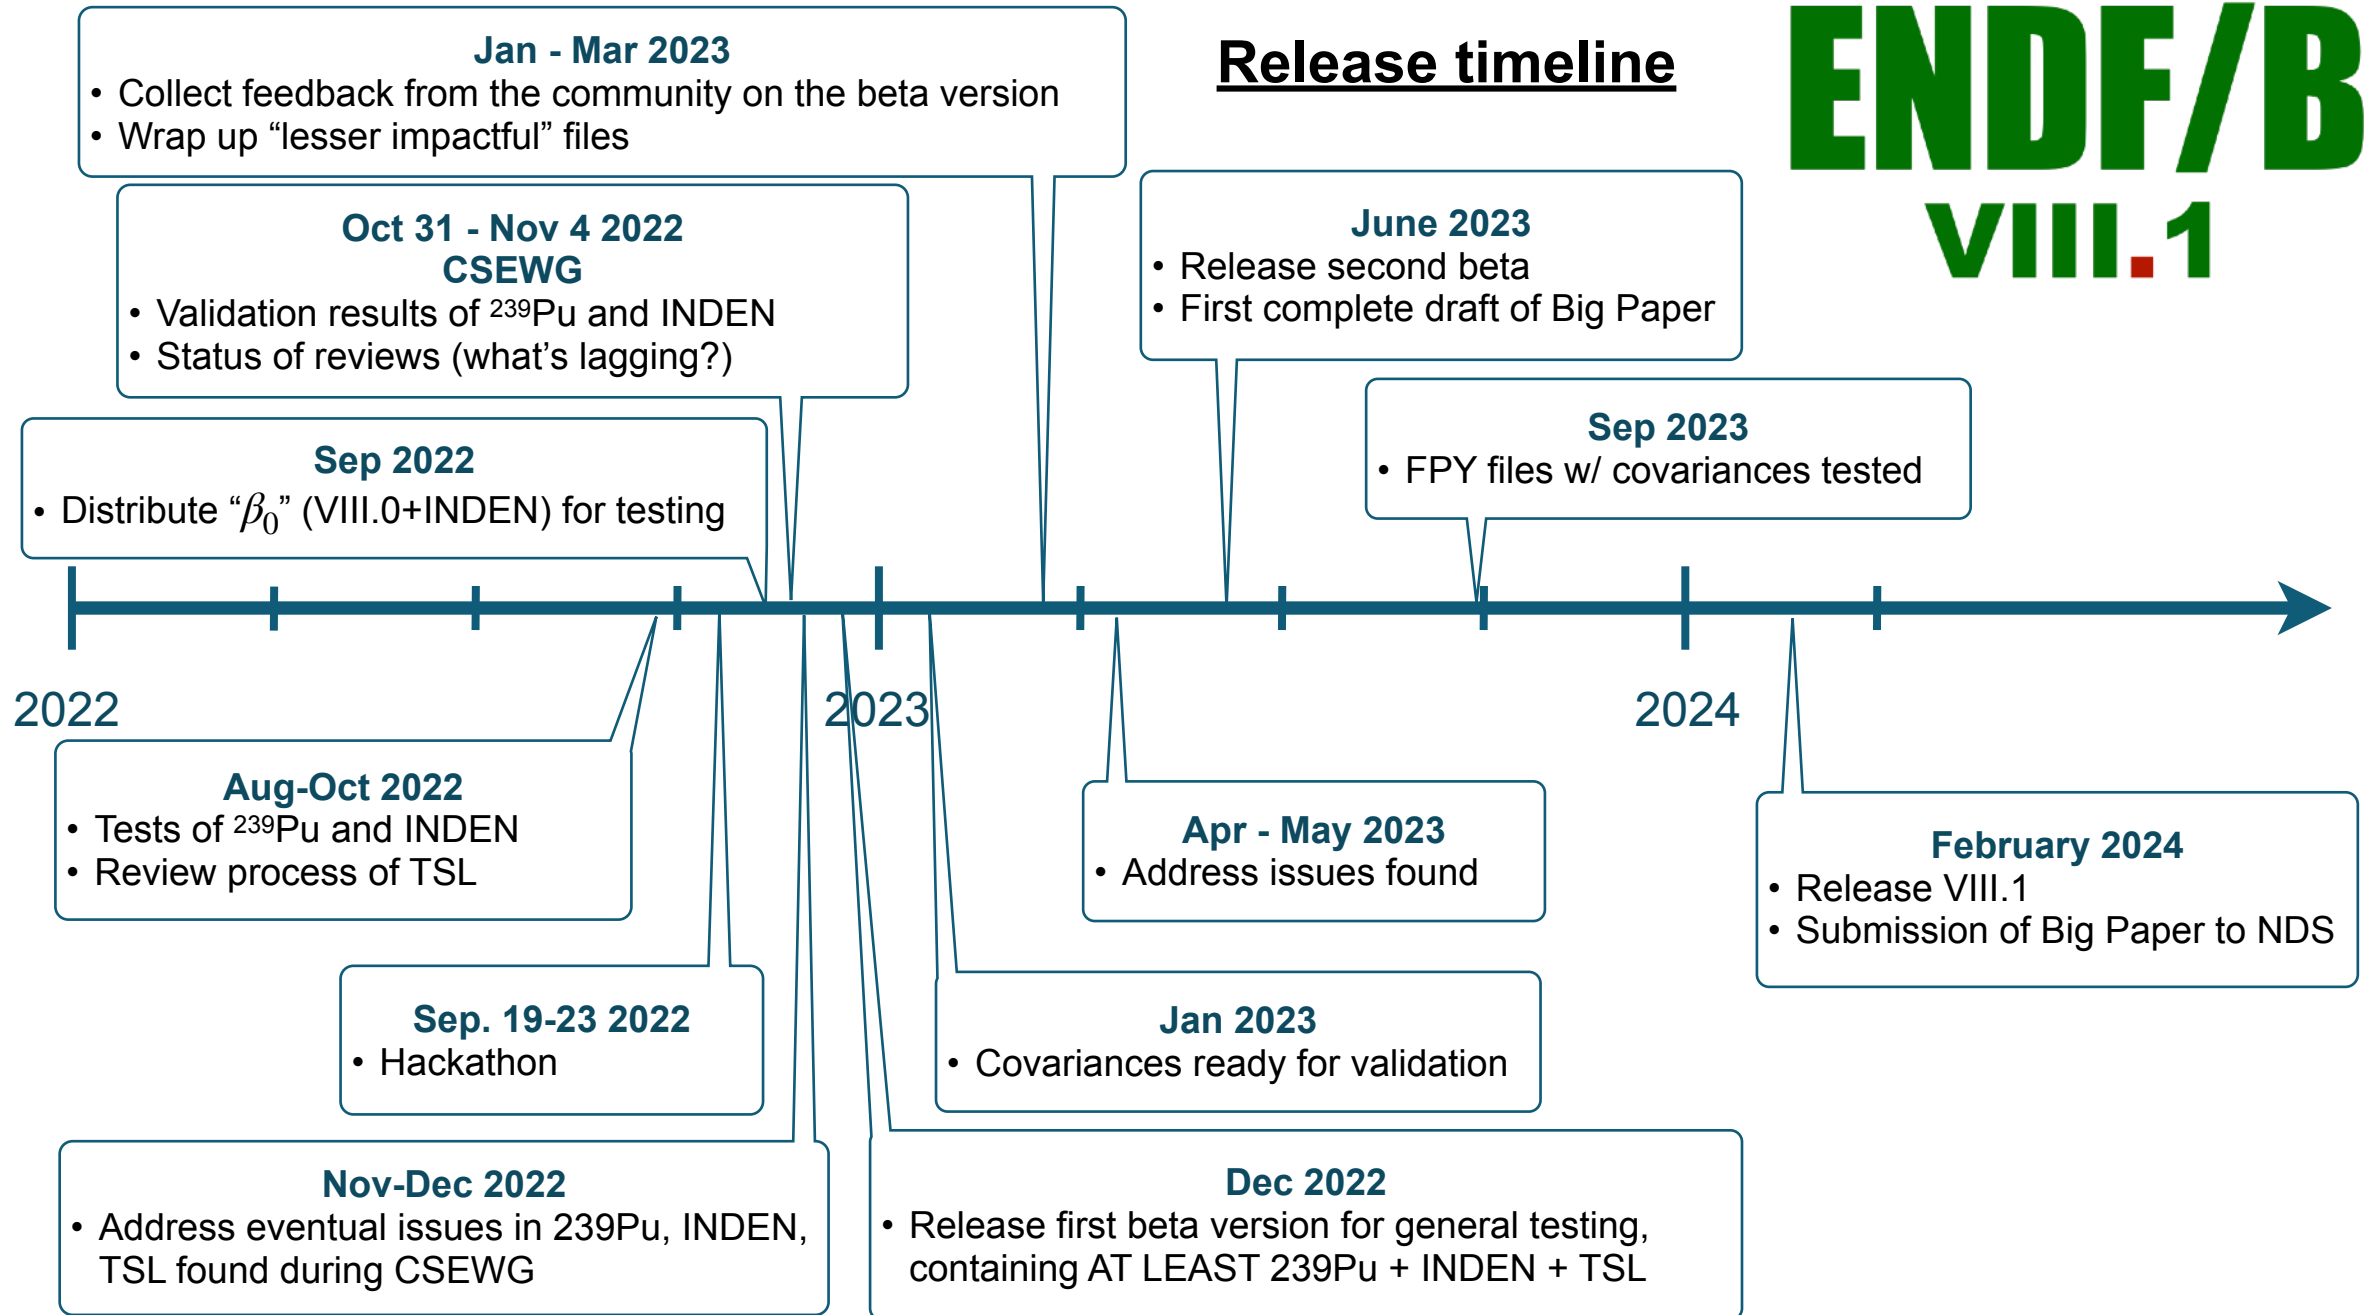

G.P.A. Nobre<sup>1</sup>

# Topics

- Release Timeline
- 2022 Hackathon
- ENDF/B-VIII.1-Beta0
- Review status for neutron sub library
- A few words on reproducibility
- A couple of things to keep in mind
- Reviewers wanted

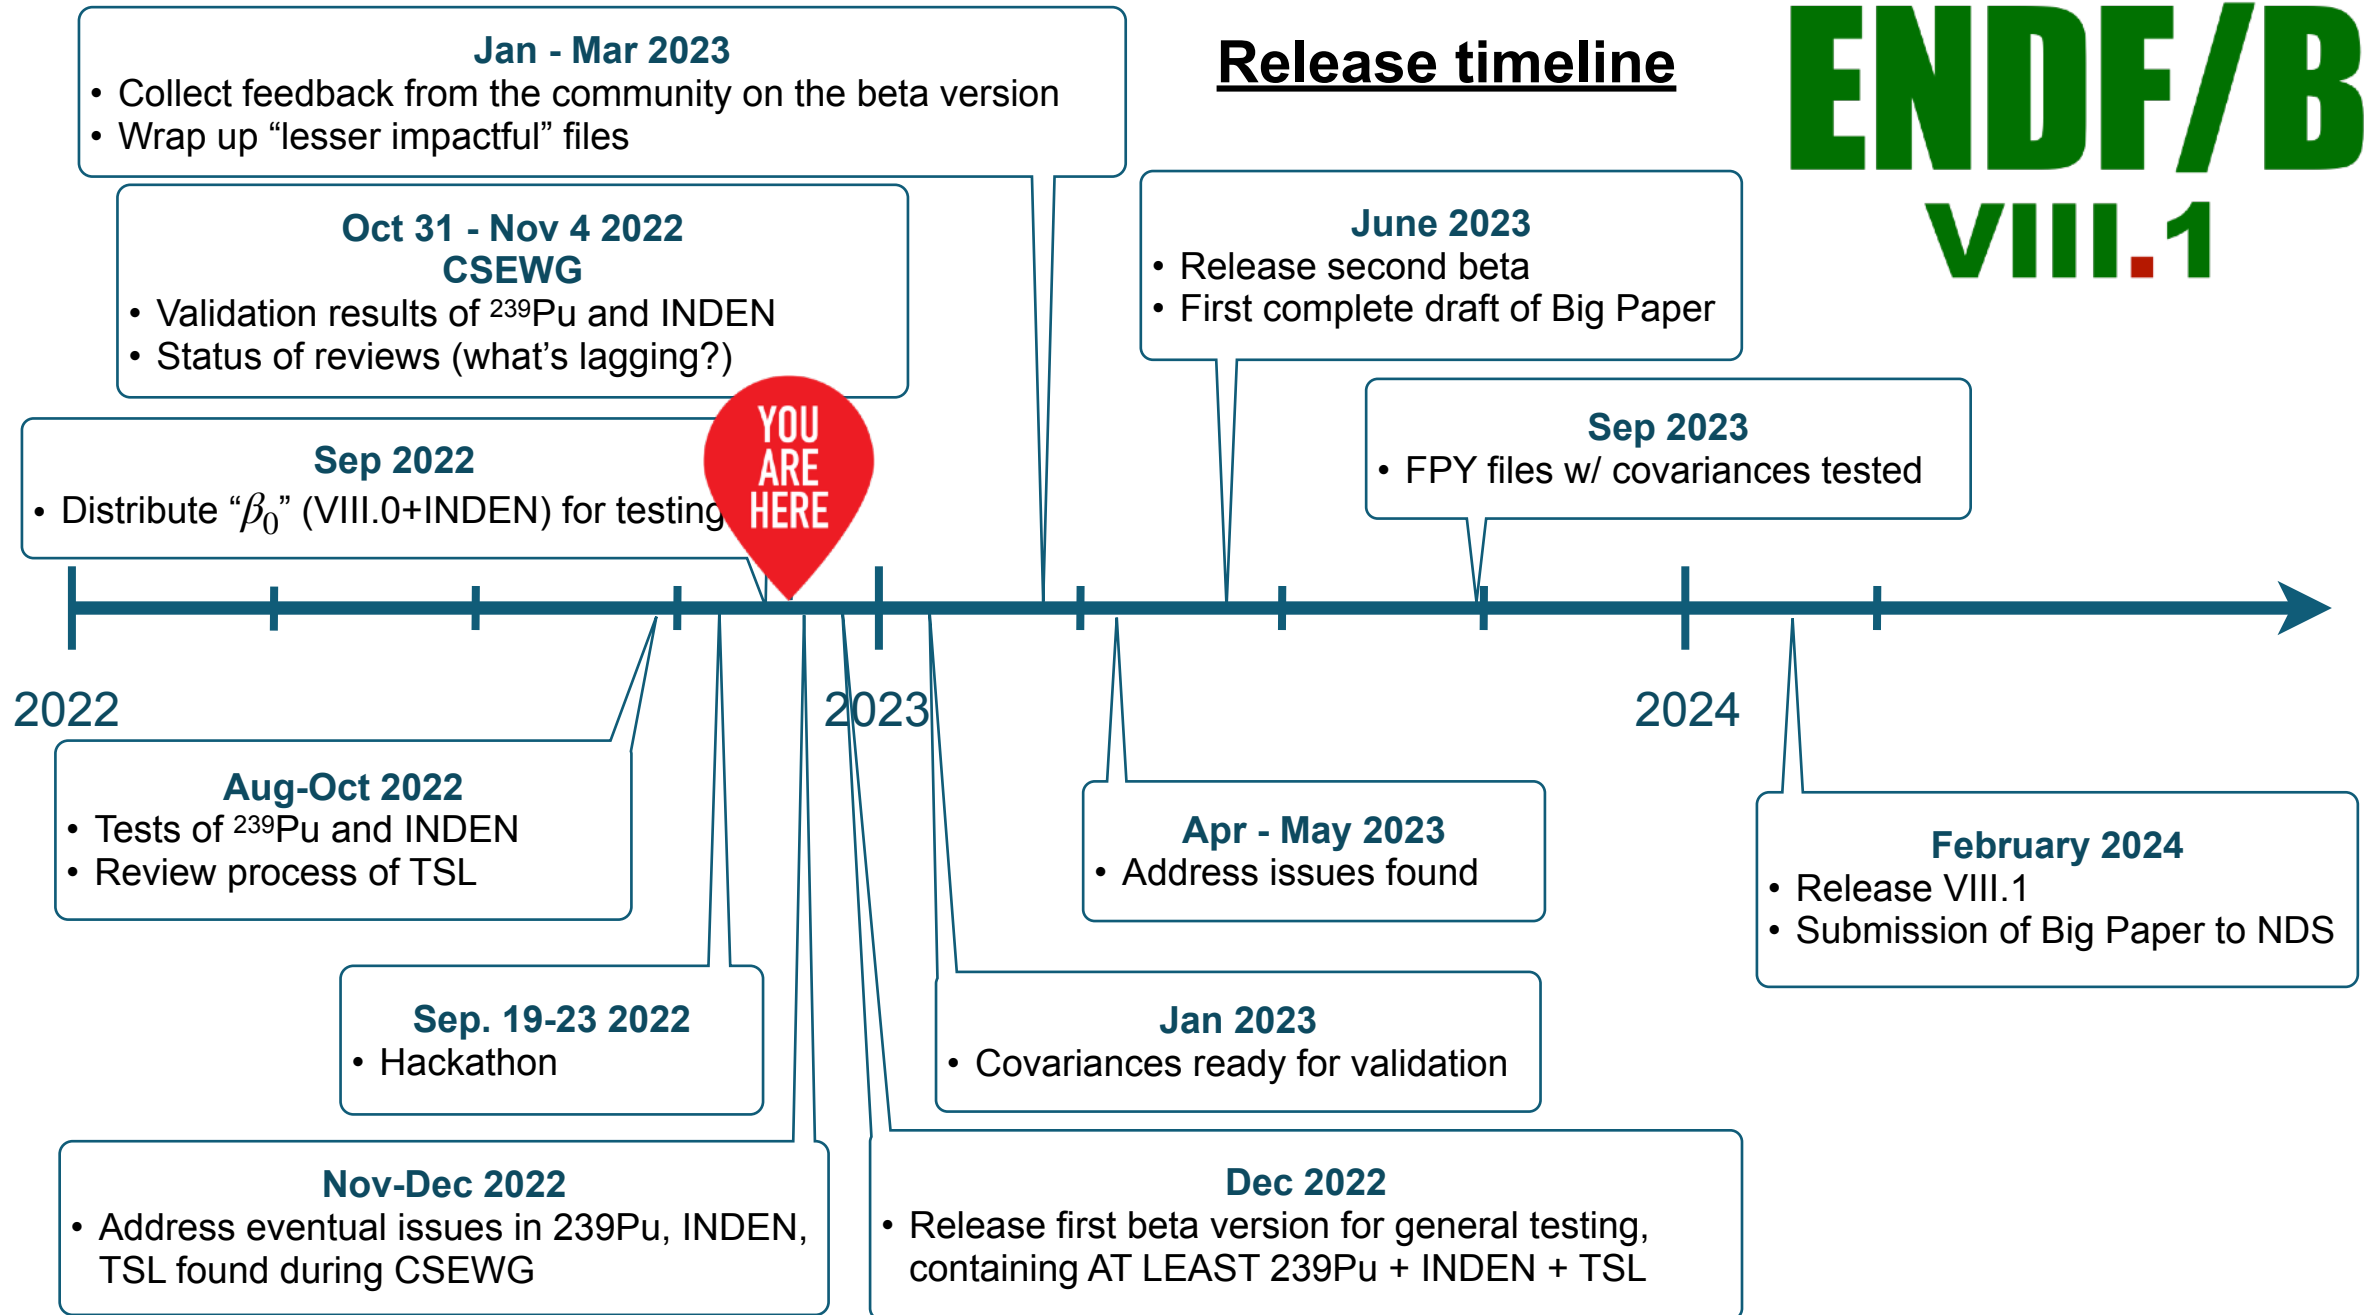

# ENDF/B VIII.1

# 2022 Hackathon

- Held on September 19-23, 2022 at BNL
- About 10 participants in person and ~5 remote
- Tracked issues resolved:
  - 22 issues for neutrons
  - 7 in decay
- More issues were found and logged
  - ~55 issues updated/opened
- Exit distributions: see Ian/Hye Young's talk
- We will plan one for 2023
  - After Beta1, before Beta2
  - Before mini-CSEWG?

# ENDF/B-VIII.1 Beta0 released

(Plural!)

# ENDF/B VIII.1

- Needed a Beta version for preliminary validation ahead of 2022 CSEWG
- No time yet for full review: Focused on neutron sub library and materials from INDEN collaboration (some degree of internal review)
- Indicate what should be the general trend of the VIII.1 release
- 3 “sub-releases”: Different  $^{239}\text{Pu}$  candidates
- Planned Beta1: December 2022
  - Single Pu file
  - Fully reviewed files
  - All sub libraries
  - Substantial testing
    - CSEWG
    - Internal validation
- Beta2: tested against crits, LPS, by LANL and LLNL users, to ensure performance is as expected.

## Changes\* in VIII.1 Beta0 from VIII.0:

- 28,29,30Si
- 50,52,53,54Cr
- 54,56,57Fe
- 63,65Cu
- 233,235,238U
- $^{239}\text{Pu}$ 
  - Beta0a: INDEN
  - Beta0b: LANL
  - Beta0c: LLNL

## Small fixes in Beta0.1:

- Release readme and change log
- $^{239}\text{Pu}$  MF1/MT458
  - Beta0a.1: INDEN
  - Beta0b.1: LANL

## Changes\* in VIII.1 Beta0.2 from VIII.0:

- $^{19}\text{F}$
- 28,29,30Si
- 50,52,53,54Cr
- 54,56,57Fe
- 63,65Cu
- 233,235,238U
- $^{239}\text{Pu}$ 
  - Beta0a.2: INDEN
  - Beta0b.2: LANL (10/17)
  - Beta0c.2: LLNL

= Changed from Beta0.1

*\*There were additional changes done shortly after the VIII.0 release, but before the whole evaluated file repository was migrated to GitLab, which are now part of ENDF/B-VIII.1Beta0:*

- $^{10}\text{B}$ : ENDF/B-VIII.0 errata
- 156,158,160,161,162,163,164Dy: Set of ORNL evaluations
- $^{192}\text{Pt}$ : Tweaked energy of first resonance
- $^{240}\text{Pu}$ : Fix of unitarity issue by LANL

# Review status - neutron sub library

## Actinides

- $^{239}\text{Pu}$ 
  - On-going collaborative process
  - Multiple evaluations are converging
  - CSEWG Executive Committee should decide the best course of action towards Beta1
  - Recommended evaluation in Beta1 should be better than when process started
- $^{235,238}\text{U}$ : waiting for reviewer assignment
- $^{233}\text{U}$ : new INDEN file is expected soon

# Main updates for VIII.1 - neutron sub library

## INDEN

- $^{235}\text{U}$
- $^{239}\text{Pu}$
- $^{238}\text{U}$
- $^{233}\text{U}$
- $^{54,56,57}\text{Fe}$
- $^{28,29,30}\text{Si}$
- $^{55}\text{Mn}$
- $^{50,52,53,54}\text{Cr}$
- $^{63,65}\text{Cu}$
- $^{18}\text{O}$  -  $^{16}\text{O}$  not ready for submission
- $^{10,11}\text{B}$  - not ready for submission
- $^{139}\text{La}$

= Submitted

= Under review

= Not submitted yet

= Approved

## Non-INDEN

- $^{140,142}\text{Ce}$  (ORNL)
- $^{103}\text{Rh}$  (RPI/IRSN)
- $^{86}\text{Kr}$  (BNL)
- $^6\text{Li}$  (LANL)
- $^{106,108,110,111,112,114,116}\text{Cd}$  (LANL)
- $^6\text{Li}$ ,  $^{234}\text{U}$  (LANL)
- $^{181}\text{Ta}$  (RPI/ORNL/  
 $\text{LANL}$ )
- Fission products (RQW+BNL):  $^{78}\text{Se}$ ,
- $^{84}\text{Kr}$ ,  $^{85}\text{Rb}$ ,  $^{97}\text{Mo}$ ,  
 $^{99}\text{Tc}$ ,  $^{102}\text{Pd}$ ,  $^{109}\text{Ag}$ ,  
 $^{113,115}\text{In}$ ,  $^{115,119}\text{Sn}$ ,  $^{127}\text{I}$ ,  
 $^{122,124}\text{Te}$ ,  $^{133,134}\text{Cs}$ ,  
 $^{130,134,137}\text{Ba}$ ,  $^{138}\text{La}$ ,  
 $^{143}\text{Pr}$ ,  $^{147}\text{Pm}$ ,  
 $^{148,150}\text{Nd}$ ,  $^{153}\text{Sm}$ ,  
 $^{155}\text{Eu}$ ,  $^{160}\text{Gd}$ ,  $^{159}\text{Tb}$ ,  
 $^{166,168,170}\text{Er}$ ,  $^{175,176}\text{Lu}$ ,  
 $^{168,176}\text{Yb}$ ,  
 $^{174,176,177,178,179,180}\text{Hf}$
- Other small fixes

# **A wish on evaluation reproducibility...**

# A wish on evaluation reproducibility...

- Let's say I bring in a delicious cake that I baked...

# A wish on evaluation reproducibility...

- Let's say I bring in a delicious cake that I baked...
- You love it, but think it would be better with more whipped cream on top and chocolate chips in it

# A wish on evaluation reproducibility...

- Let's say I bring in a delicious cake that I baked...
- You love it, but think it would be better with more whipped cream on top and chocolate chips in it
- I say, "No problem, here's the cake! Put it in yourself!"

# A wish on evaluation reproducibility...

- "Here's a detailed, quantified, well-documented description of what was done."

- "Here's all that **AND** a portable script that does the file assembly."

- "Here's a container/virtual environment with all the evaluation and assembly codes, with corresponding inputs, which assembles the final evaluation with a single command."

# A wish on evaluation reproducibility...

- Let's say I bring in a delicious cake that I baked...
- You love it, but think it would be better with more whipped cream on top and chocolate chips in it
- I say, "No problem, here's the cake! Put it in yourself!"
- I say, "The ingredients are eggs, flour, etc..."
- "Ok, here is the recipe!"

Similarly, for reproducibility's sake and streamlining improvements, a recipe should be given on how the file was assembled.

- "Here's the file! Put your improvement in!"

- "Here's the qualitative description of what was done."

- "Here's a detailed, quantified, well-documented description of what was done."

- "Here's all that **AND** a portable script that does the file assembly."

- "Here's a container/virtual environment with all the evaluation and assembly codes, with corresponding inputs, which assembles the final evaluation with a single command."

Any step in this direction is a welcome one!

# A wish on evaluation reproducibility...

- Let's say I bring in a delicious cake that I have just baked...
- You love it, but think it would be better with whipped cream on top and chocolate chips in it
- I say, "No problem, here's the cake! Put it in yourself!"
- I say, "The ingredients are eggs, flour, etc..."
- "Ok, here is the recipe!"

So we don't have to reverse engineer the baking of a cake...

Similarly, for reproducibility's sake and streamlining improvements, a recipe should be given on how the file was assembled.

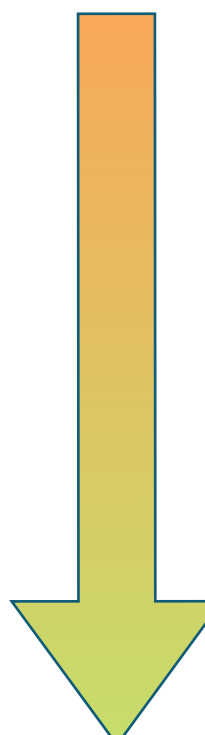

- "Here's the file! Put your improvement in!"

- "Here's the qualitative description of what was done."

- "Here's a detailed, quantified, well-documented description of what was done."

- "Here's all that **AND** a portable script that does the file assembly."

- "Here's a container/virtual environment with all the evaluation and assembly codes, with corresponding inputs, which assembles the final evaluation with a single command."

Any step in this direction is a welcome one!

# Two general observations

- We've been seeing new evaluations
  - overwriting or ignoring existing gamma-spectra information
  - not formatting gamma spectra
- Many applications are particularly sensitive to that
- Ideally, gamma spectra should be improved consistently with the rest of the evaluation, or at least have the previous one preserved.

# Two general observations

- We've been seeing new evaluations
  - overwriting or ignoring existing gamma-spectra information
  - not formatting gamma spectra
- Many applications are particularly sensitive to that
- Ideally, gamma spectra should be improved consistently with the rest of the evaluation, or at least have the previous one preserved.

- Many evaluators, for good reasons, will keep on working on their files before the next release
- Beware, though, that there may have been small fixes or corrections to your evaluation after it has been sent.
- It's worth checking the **history** of your file in phase1/phase2 branches so you don't accidentally overwrite an eventual correction or format fix, forcing it to be done again.

# Pardon my recruiting...

- We need volunteer reviewers!
- Specially for the decay, fission, and neutron
- The number of reviewers has been the main **bottleneck**
- To have a major portion of submitted evaluations included in Beta1, we have to move fast

# WE WANT YOU!

... to be a volunteer reviewer!
