

# IT Services Update - Liaison - 5/5/22

- Wwww4 (~user home pages):
  - Moved to new reverse web proxy and replaced backend apache server
    - Directory auto-indexing disabled for improved Cyber Security compliance
    - user cgi/php also not allowed
- Globus Online changes
  - Two SDCC servers for ~1 month (Auth change: old: kerberos - new: CILogon)
  - same names, different UUIDs (see announcement)
- RHEV upgrade in progress (NSLS2 & SDCC - RHEL & RHEV versions)
- Lustre:
  - LQCD: BNLBox data backed up, migrating data to new hardware now
  - Working on improved, more detailed Lustre monitoring (grafana metrics)
- Web: USAtlas Drupal: planning to go live on June 1st
  - DataArt delivered some more updates this week
    - Remaining updates to be delivered next week and the following week
  - Working on adding BNL AD logins (requires new Realm to be setup for MFA)
- NX: testing RHEL8 terminal server
  - Also testing USB device (SmartCard) passthrough
  - /tmp - KDE Konsole: don't enable unlimited history
  - Will disable save password feature (stored scrambled, not encrypted)
