

Welcome

Giacomo Contin, Laura Gonella, Ernst Sichtermann

EIC Silicon Consortium General Meeting
May 23, 2022

Meeting past May 9 focused on eRD104 and eRD111,

- some aspects of timelines to be (further) clarified,
- any other issues, please share - solutions may or may not exist, but would like to keep abreast,

Today's agenda — <https://indico.bnl.gov/event/15924/> — focuses on sensor development,

- Iain will update us on Silicon Design Work, including aspects of MLR1 testing,
- Grzegorz will discuss planning for contributions to ITS3 and development towards EIC
- A dedicated contribution to testing ran into logistics with multiple speakers — defer for now,
- Make a start on revisiting test intent / plans and logistics,
 - January 27 meeting — <https://indico.bnl.gov/event/14561/> — led by Giacomo continues to form the basis,
 - logistics
- AOB

Next meeting

- We would like to keep a bi-weekly schedule. Is Monday June 6 starting at 13:00 EDT practical / optimal?
- Proposed main topic: revisit sensor-implications on vertex layers, sagitta layers / staves, disks, sensor stitching.
