

Updates from/on Colleagues and Institutes that want to participate in ITS3 WP3

January 27 meeting — <https://indico.bnl.gov/event/14561/> — led by Giacomo continues to form the basis, I (ES) will simply re-use two slides:

Participation in beam test data analysis

- Very welcome (at the moment understaffed)
- Does not require test system / lab equipment
- Can be done from remote
- Does require deep training
 - EUDAQ telescope framework
 - Beam test data format
 - Chip data format and interpretation
- Participation in beam test data taking is also welcome, if followed/preceded by data analysis / chip testing in laboratory

Analysis of existing test beam data is getting underway at UC-Berkeley / LBNL,

~~Update at future mtg.~~
First look (here) today.

Updates from/on Colleagues and Institutes that want to participate in ITS3 WP3

January 27 meeting — <https://indico.bnl.gov/event/14561/> — led by Giacomo continues to form the basis, I (ES) will simply re-use two slides:

EIC SC Institute participation summary

Institute	Contact person	Also ALICE ITS3	Requested a Test system	Has a test system	Active Tasks
Birmingham	Laura Gonella	no	yes		
RAL	Fergus Wilson	no	yes		
Liverpool	Marielle Chartier	yes	yes		
Lancaster	Harald Fox	no	yes		
Brunel	Liliana Teodorescu	no			
Daresbury	Marcello Borri	yes	yes		
University of Chicago Illinois	Zhenyu Ye	no			
CAPADS Prague	Lukáš Tomášek	no	yes		
ORNL	Jo Schambach	no			
LBNL/UC	Barbara Jacak	yes	yes		
JLAB	Brian Eng	no	yes		
INFN Trieste	Giacomo Contin	yes	n.a.	yes	DPTS, APTS, Bent ALPIDE characterization

Updates?

2nd batch production is a bit behind the original schedule, affecting also our testing,

Started to investigate if and how we can help this production along via LBL.
