EPIC[*] Convener Meeting
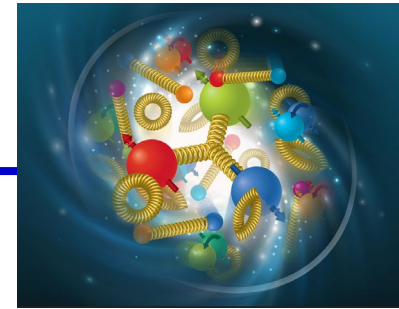

8/5, 2022

Silvia Dalla Torre, Or Hen, Tanja Horn, John Lajoie, Bernd Surrow

(*) EPIC or ePIC ? Still an open point …

INTRODUCTORY NOTES

- **This Convener Meeting after the first EPIC in person/hybrid meeting**
  - **Successful meeting !**
  - **this result largely thanks to the EPIC WGs and their conveners (high quality work done and robust presentations at the meeting)**

- **A 2 day-long meeting with in person option has shown its positive potential**
  - **Another EPIC in person/hybrid meeting in 6 months is being considered; news in September**

YOUR FEEDBACK

- **This Convener Meeting to collect your feedback**

Topics for the feedback:

- ➢ the Softw/Comp and Sim/QA WGs have announced major decisions in their sector; does this remove some hesitations in engaging in <u>further software efforts</u> and developments as well as in simulation exercises or there are still large margins of uncertainty?
- ➢ the need of <u>a coordinator of the simulation effort</u> was mentioned during the EPIC meeting; which is your point of view about?
- ➢ are there <u>other forms of coordination</u> needed to facilitate your work?
- ➢ which is the <u>workforce status for the sub-detector implementation in the simulation and for the reconstruction algorithms</u>?

- ➢ **Other feedback items**
