

Hi all,

Here is the minutes from today's meeting.

o Offline convention <Joseph>

- Studied the convention for INTT predefined in offline software. The ladder=0 starts from $x=0$ coordinate and phi-direction runs in counter clockwise. Unfortunately this is inconsistent with the hardware ladder number assigned whose ladder=0 starts from $y=0$ and runs in clockwise. Since it is too late to change the convention neither hardware nor offline software, we have to live with them. **Joseph** develops translation table.
- Chris announced the online monitor workfest is scheduled on 25th(Mon) and 26th(Tue) next week, and its training session on 29th(Fri). In addition to Perdue group, **Cheng-Wei** should attend these events. The workshop may be held in hybrid mode, but Cheng-Wei should make sure to get on the network before the next week.
- **Perdue group** started to look into the FVTX unpacker. The output data format will be studied and to be reported to INTT meeting next week or so and then provide the information to Raul

o Production Status <Itaru>

- The BCLK cables are finalized and Itaru is about to through the procurement.
- The lapping harness with the acetate tape in Itaru's 2nd attempt was successful. **Itaru** will make a procurement soon for the production conversion cables.
- Debugged optical data fiber latch issue with John Kuczetsky. The debugging is in progress. Once we solve this issue, we'll try to debug the partial data drop issue as well with John.
- **Itaru** will set up doodle for the INTT collaboration meeting.

Best regards,

-itaru
