Hi all,

Here are the minutes from today's meeting.

o CFC tube <Rachid>

- The outer tube is in the final survey. To be shipped to BNL by the end of next week.
- We are still not able to operate the control board for the filter board. We'll try the USB version next week to make sure the hardware is working.

o Ladder Notation and online monitor <Joseph>

- Genki already made a pull request for the small shift in the phi-angle bug of the barrel ladder location. **Joseph** will let LANL people know this update.
- **Genki** will confirm the East-West coordinate in the hardware ladder name figure and update.

o INTT Fiber configuration <Rachid>

- Rachid will upload presentation slides.

o Production Status <Itaru>

- The first round measurement of BNL-ROC boards has been completed. No class-1 ROC candidate was observed. 3 ROC boards are to be returned from the repair early next week and they will be tested to find another class-1 ROC board.
- Please make an entry to the doodle for INTT collaboration meeting date.
