

Offline conventions for the INTT

Joseph Bertaux
Wei Xie

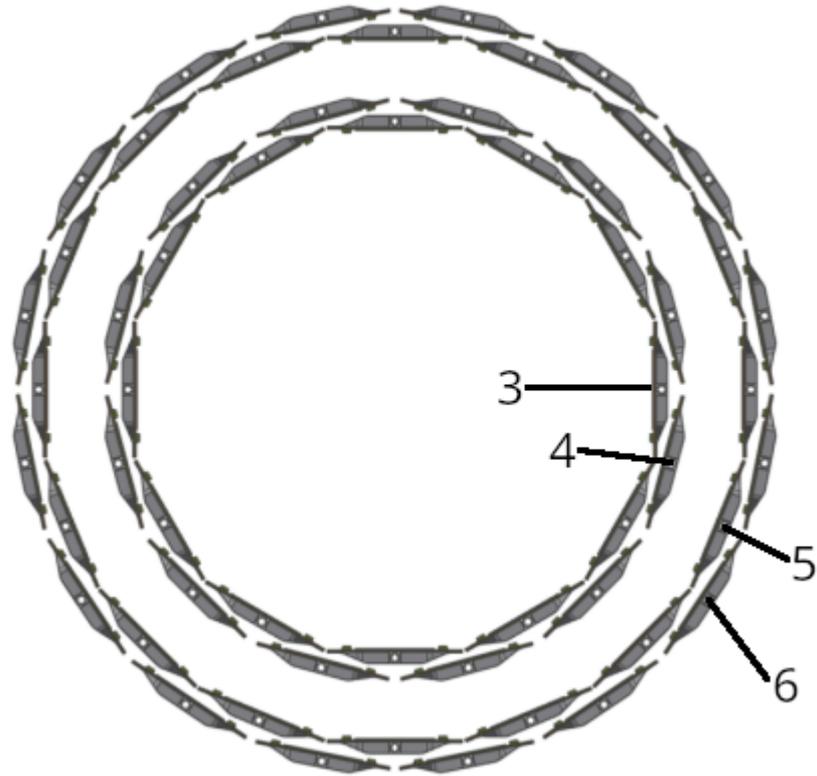

Procedure

- Created a Fun4All script which would output the indices (layer, ladder_z, ladder_phi, strip_row, strip_col) with the physical location of the hit in global coordinates (gx, gy, gz)
- Can then draw or filter to see the physical location of some part of INTT

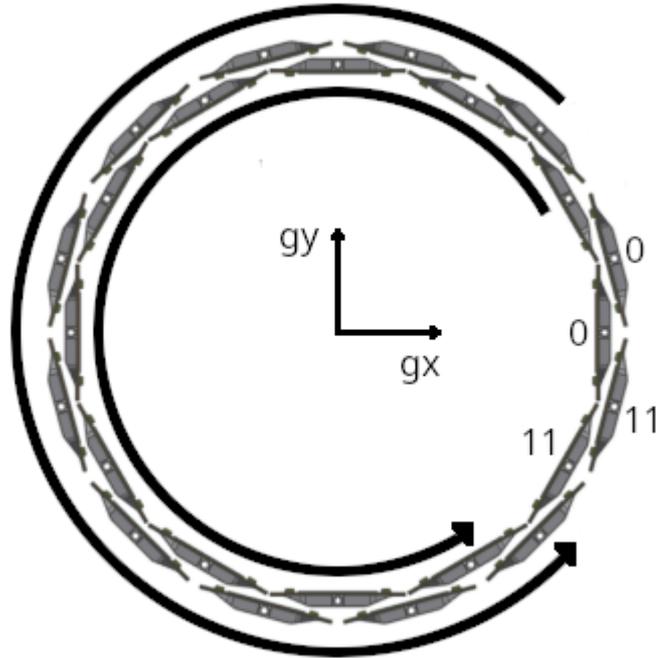

INTT (Front)

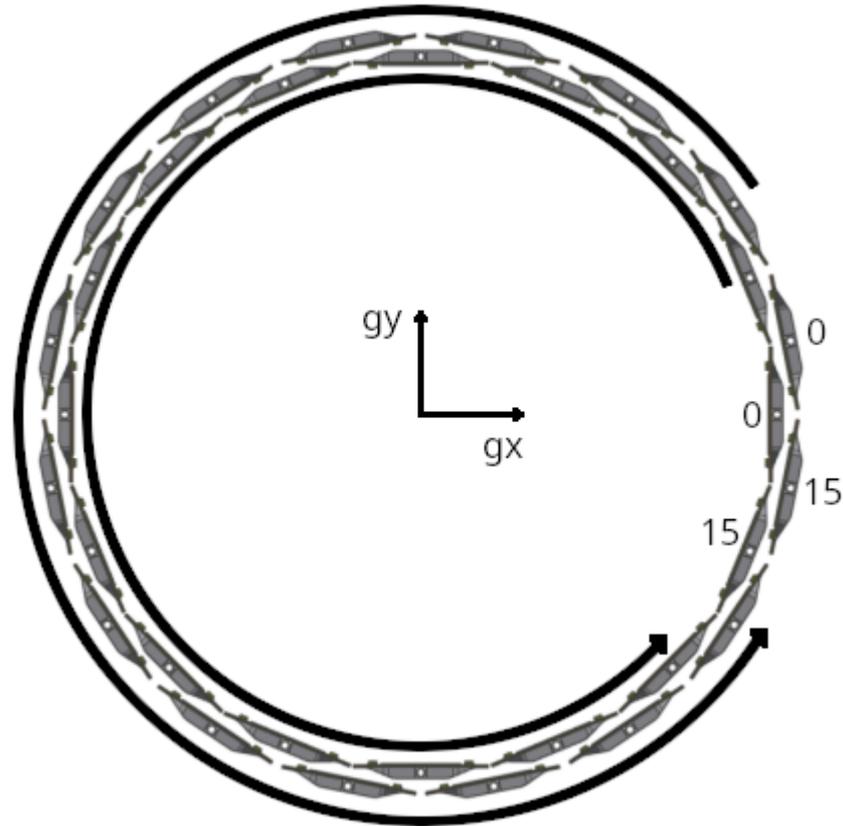

Layer

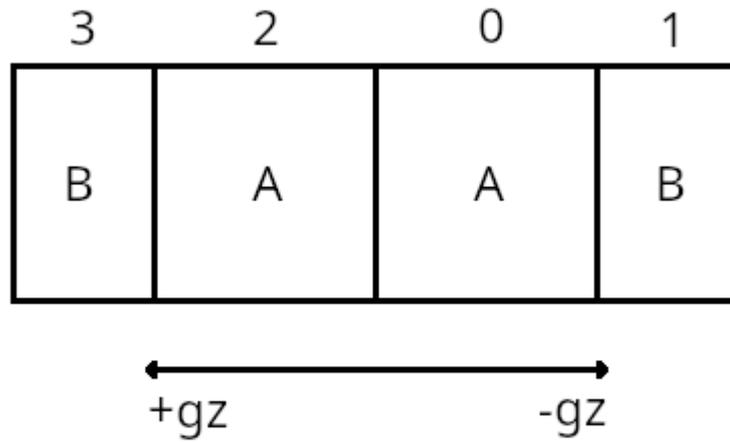

Ladder_phi (Layers 3 & 4)

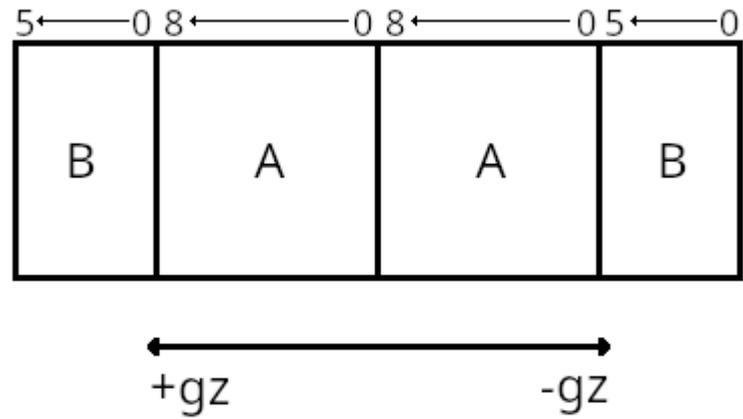

Ladder_phi (Layers 5 & 6)

Ladder_z

Strip_col

Strip_row
