Itaru Nakagawa

# Collaboration Meeting Aug.16 and 17 Morning

Tuesday

Wednesday

**INTT Weekly meeting**

Tuesday Aug 16, 2022, 9:00 AM → 12:19 PM US/Eastern

Description Meeting URL  
<https://zoom.us/j/92149923535>

9:00 AM → 9:20 AM	<b>INTT Barrel Assembly</b> Speaker: Rachid Nouicef (Brookhaven National Laboratory)	20m
9:20 AM → 9:40 AM	<b>Barrel Test</b> Speaker: Dr Genki NUKAZUKA (RIKEN BNL Research Center)	20m
9:40 AM → 10:00 AM	<b>Cooling System</b> Speaker: Robert Pisaní (BNL, sPhenix)	20m
10:00 AM → 10:20 AM	<b>LV/HV System</b> Speakers: Dr Ivan Kotov (BNL Instrumentation Division), Ivan Kotov (BNL)	20m
10:20 AM → 10:40 AM	<b>Coffee Break</b>	20m
10:40 AM → 11:00 AM	<b>Barrel Installation</b> Speaker: Dan Cacace (BNL)	20m
11:00 AM → 11:20 AM	<b>Felix Readout</b> Speaker: Raul Cecato	20m
11:20 AM → 11:40 AM	<b>ROC FPGA Modification</b> Speaker: Takashi Hachiya (RIKEN)	20m
11:40 AM → 12:00 PM	<b>Expert GUI</b> Speaker: Hikaru Imai (riken/Rikyo Univ.)	20m

**INTT Weekly meeting**

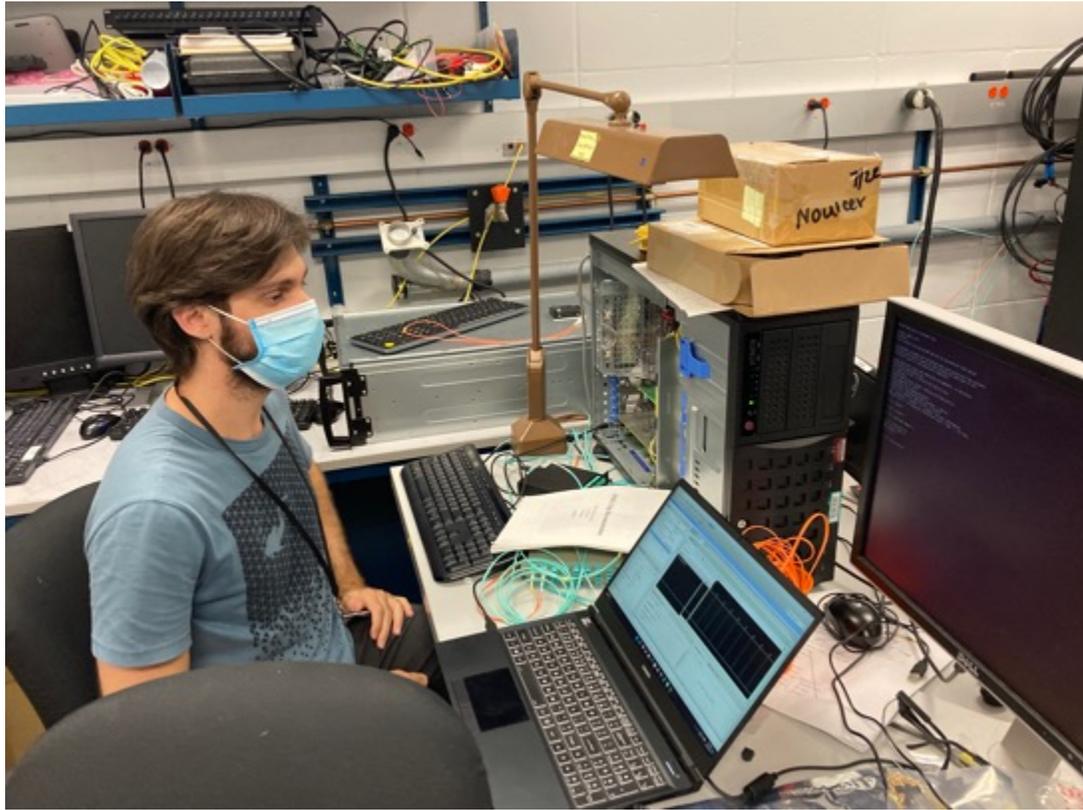

Wednesday Aug 17, 2022, 9:00 AM → 12:19 PM US/Eastern

Description Meeting URL  
<https://zoom.us/j/92149923535>

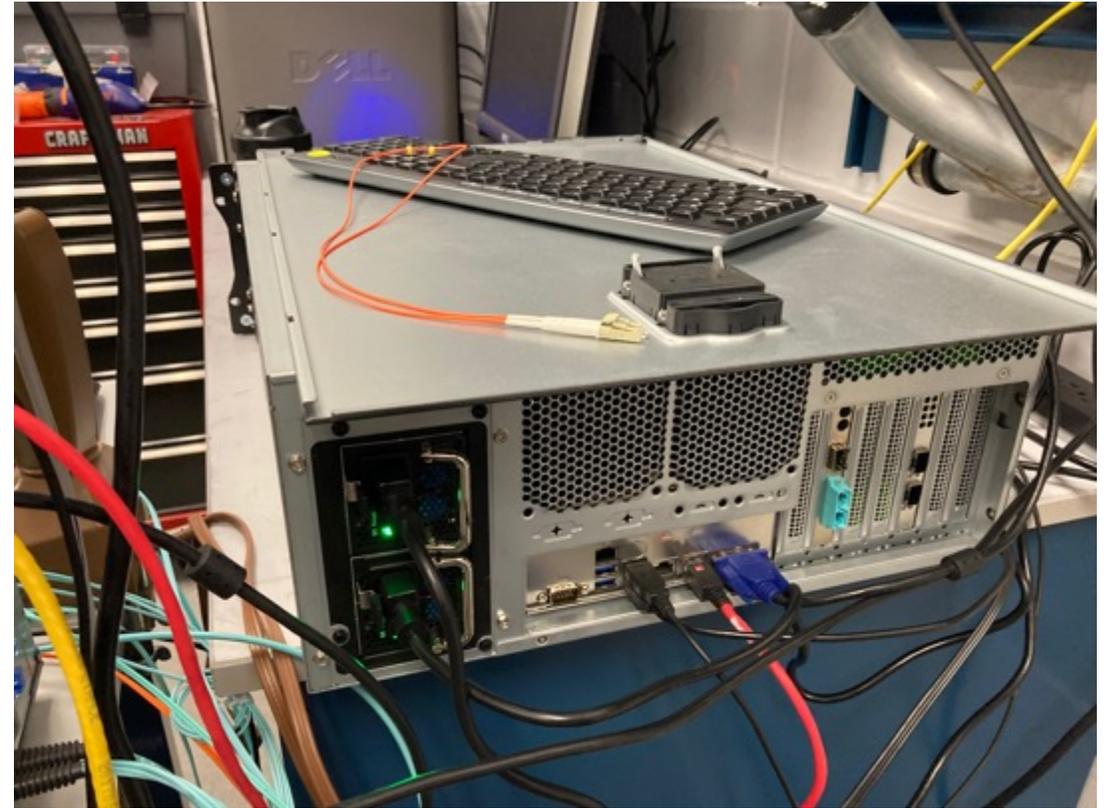

9:00 AM → 9:20 AM	<b>sPHENIX physics summary</b> Speaker: Dr Genki NUKAZUKA (RIKEN BNL Research Center)	20m
9:20 AM → 9:40 AM	<b>INTT Beam Test Results and Unresolved Issues</b> Speaker: cheng wei shih	20m
9:40 AM → 10:00 AM	<b>Cosmic Ray Measurement at NWU</b> Speaker: Yumika Namimoto	20m
10:00 AM → 10:20 AM	<b>Low level semi-online/offline software</b> Speaker: Wei Xie (Purdue University)	20m
10:20 AM → 10:40 AM	<b>Coffee Break</b>	20m
10:40 AM → 11:00 AM	<b>Online Monitor</b> Speaker: Joseph Bertaux (staff@purdue.edu; student@purdue.edu; member@purdue.edu; employee@purdue.edu)	20m
11:00 AM → 11:20 AM	<b>1008 ROC Repair Status</b> Speaker: Dr Itaru Nakagawa (RIKEN)	20m
11:20 AM → 12:00 PM	<b>Near/long term future schedule and task lists</b> Speaker: All	40m

# Felix Readout

# 2<sup>nd</sup> Felix Server

- Raul completed setting up 2<sup>nd</sup> felix server.
- It is ready for data taking.
- The plan is to start data taking with the 2<sup>nd</sup> felix server next week.

# Load Map

- Currently working with Raul to study failure modes of FPHX readback.
- 1-bit off issue also observed in Felix, but some chips are not sending back readback at all.
- Try readback function without bus extender.
- Next step is to work with Takashi to see if ROC FPGA-SC modification works.
- Once this function is established in Felix readout, we'll start implementation of the expert GUI with 2<sup>nd</sup> Felix server.

# Collaboration Meeting

# Open Issues

	Issue	Plan
m-coax	Partial data drop	Modify ROC slow control FPGA to make the readbacker working
ROC	Data Fiber Latch	Serializer debugging with John K.
ROC	Unfunctional Calibration Pulse	Re-download ROC Slow Control FPGA
