

IT Services Update - Liaison - 10/6/22

- rcf mail server: bounced ~350 incoming emails over ~5 hours ~2 weeks ago
 - caused by Cyber Security DNS blacklist of spamhaus records from an external feed
 - legacy spam config removed from our postfix mail server, no longer needed
- sPHENIX discourse server
 - new OAuth plugin tested, next need help testing ldap group membership
- sPHENIX CVMFS calibration filesystem ready
 - mount available on Farm today, writable only by sphnxpro
- ENDIT: ATLAS deployment & monitoring dashboard completed
 - helping debug possible ENDIT/HPSS issues
- sPHENIX Lustre problem: OSS server needed reboot earlier this week
 - looks like similar problem as before (~1 month ago), updated support ticket
- NSLS2 power problems affected their NTP service
 - reconfigured 2 SDCC NTP servers to provide NSLS2 network connectivity
 - looking into options to buy new NTP servers located in NSLS2 building
- sPHENIX MediaWiki image conversion problem fixed
- USAtlas Drupal events tab broken - working on fix
- NX upgrade: next Wednesday 10/12 morning
 - latest NX 7 version (support for SmartCard/Yubikeys client only, not web)
 - will begin testing RHEL8 & NX 8 for the next upgrade
