

Welcome

Jan C. Bernauer

SRO ad-hoc workshop December 2022

RBRC

RIKEN BNL Research Center

**Stony Brook
University**

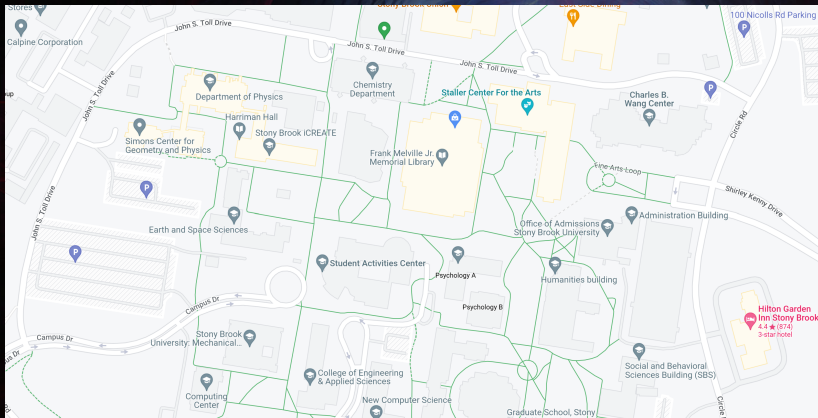

**Center for Frontiers
in Nuclear Science**

Welcome

Welcome. So we tricked you to come to SBU. What to do now?

► **Lasciate ogni speranza, voi ch'entrate!**

Parking

- ▶ Parking is free, but you need a visitor pass **on the dashboard**
- ▶ If you don't have one, I have some here.

Coffee

- ▶ Will have coffee / cookies at 10:30 and 15:30
- ▶ We should try to be on time.

Lunch

- ▶ Working lunch. Bill will get pizza from Station pizza
- ▶ Everyone OK with that?
- ▶ Who wants what?
- ▶ Vegetarian / Meat (Sausage, beef, pepperoni) / Buffalo Chicken / ???

History of our meetings

- ▶ We had 10 multi-day meetings since 2017, about 2/year
- ▶ Purpose
 - ▶ Promote SR as a new, better paradigm for DAQ design
→ especially for EIC
 - ▶ Build a community of experts
→ NOT limited to EIC
 - ▶ Connect with commercial providers
 - ▶ Investigate the solution space

SRO is more than chips: last meeting's topics

For details: <https://indico.jlab.org/event/519>

- ▶ SRO for EIC (status / rates / plans)
- ▶ Current / near future SRO realizations
- ▶ FEE electronics
- ▶ Timing infrastructure
- ▶ Data flow / data model
- ▶ Machine Learning in the readout pipeline

The future

SRO is the chosen paradigm for EPIC. Mission accomplished? Do we need to change?

- ▶ We now have to design the DAQ specific for EPIC.
 - Shorter, focused meetings with stakeholders. Like this one.
- ▶ But we should keep the connection to the broader community
 - ▶ Learn from each other
 - ▶ Find synergies (development, but also demand vs. commercial providers)

→ Keep the non-EIC-specific multi-day meetings, but only 1 per year or less.
