

IT Services Update - Liaison - 11/3/22

- NSLS2: finished requests for Lustre, DB and system monitoring exporter
- NSLS2: working on reinstalling some servers with RHEL, some finished, resolving some problems with remaining
- VMWare testing continues:
 - HA failover & RHEV→VMWare conversion/migration
- USAtlas Drupal updates for roles & permissions, and tile layout
 - events tab still needs to be fixed, plus the events & news pages broke
- sPHENIX MediaWiki: logout problem sort of fixed (~1 hour)
- Cosmo web: updated from manual site to Drupal last week
 - Need to resolve some issues: home dirs, local passwords, CGI,
- SDCC web: scanned for broken links and fixed
- CVMFS calibration area for sPHENIX ready: check every 5 minutes
- Looking into Belle II CBD timeout issues under high load
- NX upgraded a few weeks ago on Wednesday, 10/12
 - slightly delayed due to some pam/auth issues, fixed in early evening
 - latest NX 7 version (support for SmartCard/Yubikeys: client only, not web)
 - will be rebuilding test NX with RHEL8 & NX 8 for the next upgrade
