

Simulation Update

Wouter Deconinck, for SimQA and CSW
November 22, 2022

1 Slide Summary

- Showstoppers identified last week
 - Field map had a unit error, then was incorrectly read as empty - fixed
 - MPGD hits missing - fixed
 - No imaging ECal clusters - fixed
 - No far forward hits - fixed
 - Forward TOF hits not included in tracking - short term workaround
- All issues resolved or have a short term workaround implemented
- Latest single particles exist on S3 at:
 - `S3/eicctest/EPIC/RECO/22.11.2`
- Physics jobs started submission this week (already ~1k DIS jobs there)
- Issue of low reconstruction CPU efficiency and job timeouts seems to have been resolved with the upgrade to JANA2 version 2.0.8
