

# EPIC Far-Forward DWG Meeting

11/29/2022

# General Updates

- EPIC simulations still running.
  - Not a lot of full reconstruction available for FF, but we can still use the hit output to study acceptances in the new framework to ensure things make sense.
  - I reached out to the Jana folks to get on the agenda to discuss the B0 tracking issue.
    - We are looking to add our vetted GenFit + KF code to EICRecon so we can have full reco in the B0. We cannot wait months to have this given the preTDR timeline.
- Roman Pots reconstruction R&D proposal was accepted.
  - Waiting to hear more details, but this is a good development for our efforts.
- Collaboration meeting is in January! Please let us know if you want to present some of your work!
  - We will begin volunteering you...
- December 13<sup>th</sup> meeting will be dedicated to rehearsals, should people want them.
- Slides should be circulated to mailing list for comment and sign-off.
