IT Services Update - Liaison - 12/1/22

- keycloak problem for ~2 hours Tuesday (11/8) morning:
  - IPA self-signed ssl cert had expired - caused keycloak user cache to empty
  - was renewed and permanent fix applied (certmonger)
- All ssl wildcard certs were renewed on 11/10 (web & mail servers)
- sPHENIX Jenkins update completed (required plugin cleanup - Jin)
- CVMFS S-0 sync hung: gpfs02 nfs mount hung - reboot required to fixed it
- STAR gpfs01 hung: staradmin scratch cleanup conflicting with user job access
- NSLS2: several servers reinstalled with RHEL8, firmware updated also
  - 5 more still to be reinstalled
- Belle2: cert replaced & java heap memory config problem prevented service start
- USAtlas Drupal site complete and available for general use
  - still working on several small updates and issues
- sPHENIX MediaWiki: still investigating logout timeout problem
- Cosmo web: new Drupal site online with access to some legacy areas
- NX: rebuilding of test NX with RHEL8 & NX 8 in progress
- Farewell to Tejas after almost 13 years at BNL
