

Services and Tools Activity Summary

Storage / dCache support ([RT support](#)) — Carlos, Qiulan, Vincent

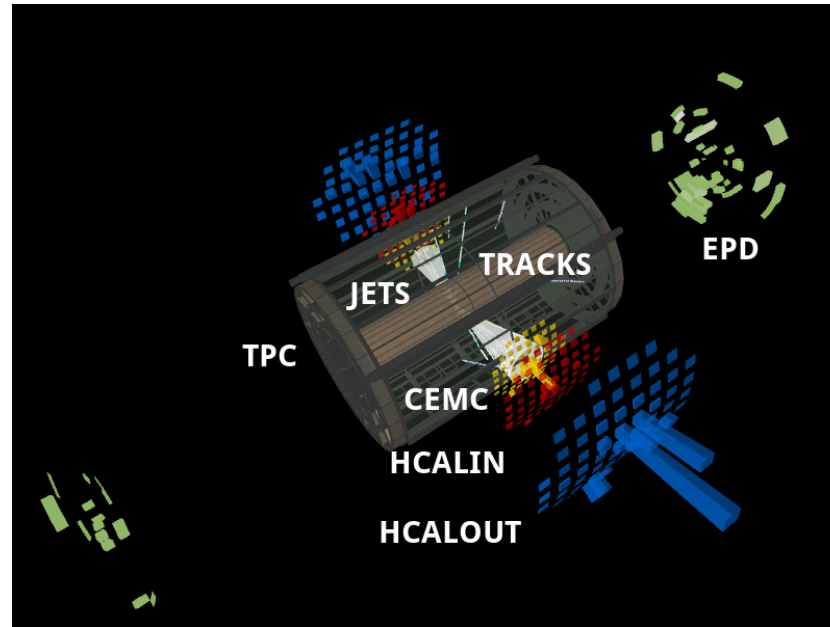

- **ATLAS**
 - BNLLAKE_LOCALGROUPDISK decommissioned — Lake* file tape families tape on HPSS cleaned
 - Pools dc0[31-34] (2.24 PB) decommissioned — Located in CDCE

General Web Services — Chris

- US-ATLAS([RT support](#)):
 - Student Census — Wrote new webform, content type and workflow to output submissions as content nodes; resulting content will be aggregated by a custom view for Excel export. Suzanne is testing, will migrate to production upon her approval
- Miscellaneous:
 - Announcements application — Testing on this continues; once we are confident in the solution we will remove existing announcements app from SDCC and point announcement submission to the new VM
 - Working with Louis to stand up small Drupal site to support Belle II experiment. Their requirements are minimal so we anticipate turning this around in a few days

Experiment support activities — Dmitry, Matt

- sPHENIX
 - Run 1 preparations
 - PanDA database setup and deployment - database services are being configured, delivery ETA ~2..3 weeks, followed by ~week of stress-testing (production mode);
 - Shift Signup service - in use now, no further requests for development received
 - Live Event Display: development has finished, all immediate needs are covered

- STAR
 - Run 23 preparations: no major changes
