

INTT

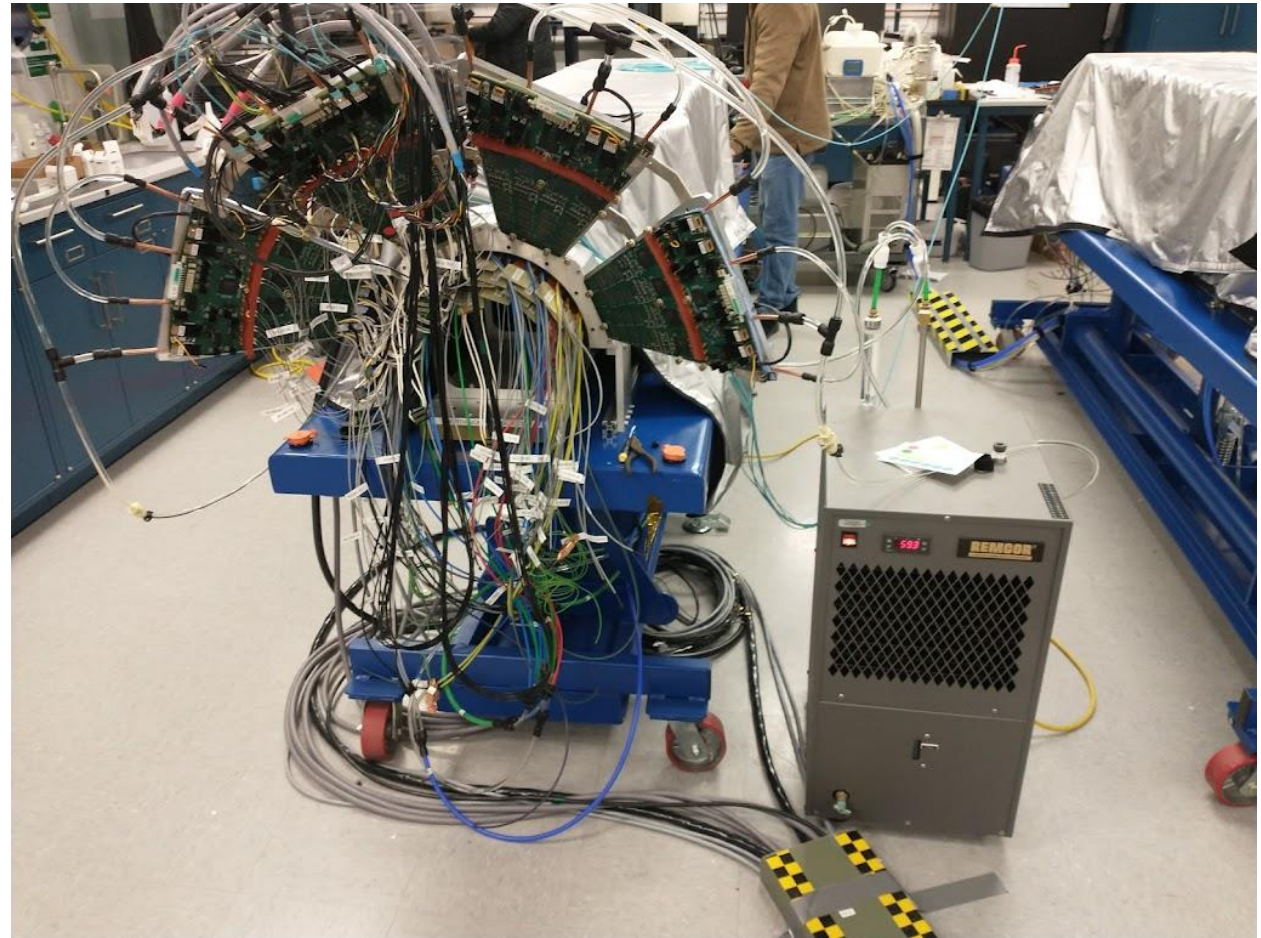

Cooling Update for Testing in IR

Feb 2023

For ROC testing in IR

ECW supply and panels may not be ready by the time we install.

Default plan is to use setup in the lab to test boards once installed

Stave Cooling

- Lines to the carriage will not be ready by the time we install the INTT.
- Plan is to set up the cooling system in the lab in the IR to cool both halves while we test.

Status of things in IR

- Panels-
 - Stave panel 50% done
 - ROC panel-Design done
- Lines into IR 50% Done
- CDU 15's need to be installed
 - These are being used to test, so have to wait to install
