GOOGLE DOC FOR QUESTIONS

Overview

Call for Remarks in the Open Session

Google Doc Question Submission

P5 (Particle Physics Project Prioritization Panel) makes recommendations on the next 10 years of the US particle physics program within the 20 year context to HEPAP, which advises DOE and NSF. It builds on the extensive community involvement in the Snowmass study. This meeting is the beginning of the information gathering mode for the panel to learn the aspiration of the community and basic ideas on costs and schedule of proposed projects. For the current plan of the panel, see a tentative web page.
