Chair of too many things

National Nuclear  
Data Center

USNDP Meeting, 13 Nov. 2023

Nuclear Data Week 2023, 13-17 Nov. 2023

@BrookhavenLab

# Motivation

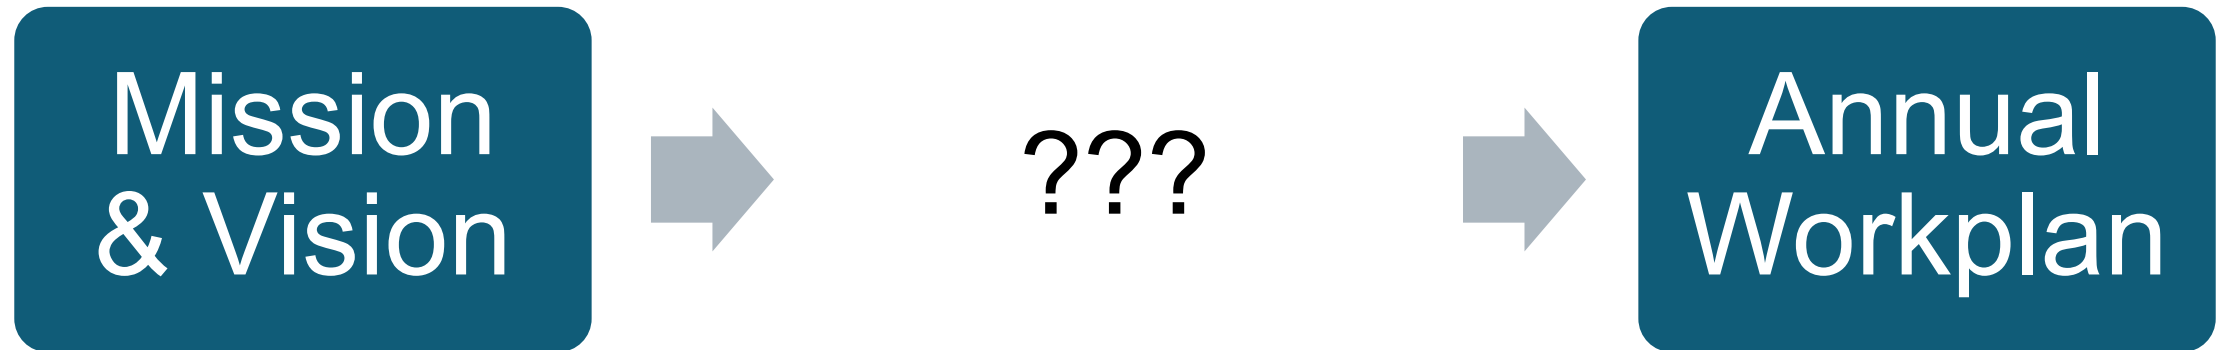

The USNDP has muddled along for quite some time without much of a long-term plan for the program

We have worked hard to set the stage for an increase to our base funding

- We are now an integral part of the NP-LRP (Chapter 11!)
- We have two NSAC reports
- We have profited from the WANDA process
- Endorsed by the NDAC multiple times

**Now is the time to make a plan and position ourselves for growth!**

# Now

- **No long term plan**

- Tasking just copied from year to year
- Sometimes it feels like we ignore the tasking or at least don't take it very seriously
- With no plan, miss opportunity to integrate into NP-LRP & other programs' plans

- **Tasking not really coupled to mission & vision**

**THE NDAC REPORT WILL LIKELY ASK FOR A STRATEGIC PLAN**

# Soon

- **Long term plan: how we will accomplish our mission (in broad strokes)**
  - Take from NSAC reports and NP-LRP when appropriate
- **Define OUR plans and priorities**
- **Couple tasking to mission & vision**
- **A chance to rethink how we organize ourselves**
