

Call for FY24 R&D Proposals on May 8, 2023

Dear current and future R&D participants,

It is time to discuss the next steps in our path, i.e., the FY24 projects. We are trying to get the R&D program fully in sync with the FY boundaries.

Proposals

1. **Please submit your proposals and progress reports (where applicable) to us by July 7, 2023.** We aspire to have a DAC meeting well in time to prepare for contracts at the beginning of FY24.
2. We expect **progress report from all ongoing projects** eRD101 to eRD113. What milestones were achieved. How did our understanding improve. What is left to do?
3. eRD102, eRD103, eRD104, eRD106, eRD107, eRD108, eRD109, eRD110, eRD111, eRD112, and eRD113 **may submit continuation proposals if and only if technical risk milestones remain.**

These new proposals should be relatively straightforward to write. Keep them short and concise. List whatever technical risks remain, the milestones, deliverables, and two money matrices showing cost/item and funding/institution to close those remaining risks. Also list the representatives for each institution. List all participating members and institutions on the front page. Please also give, if applicable, an outlook for the years past FY24.

Be aware that **R&D should not be mixed with PED**. If you are not sure, talk to us. The proposals should concentrate on detector R&D tasks that mitigate project detector technical, risk.

DAC Review Meeting

With the project detector R&D expected to dwindle down at CD-2, we will limit the meeting to a two-day review meeting in the July-August period. The FY24 proposal goals of all continuation projects should be presented as well as a short status report of all FY22/FY23 proposals. More details on this meeting will be announced soon.

Best regards,
Elke, Rolf, and Thomas

AC-LGAD R&D FY23 Deliverables

- Sensor prototype with 30 ps time and spatial resolution match RPs and Tracker;
Sensor prototype with 20 ps time resolution for ToF.
- 1st sensor + ASIC demonstrator for EIC applications and testing with particle beam.
- 2nd ASIC prototype submissions with better performance and extended features.
- ~~Irradiation campaign for sensor and ASIC prototypes.~~
- Design and prototype of flexes, ~~interconnects and off-detector electronics.~~
- Design and prototype of light-weight structure with embedded cooling tubes.

eRD112

- Sensor R&D
 - TCAD simulation
 - BNL, HPK productions
 - Lab/beam/irradiation
- Sensor/ASIC integration
 - Interposer
- Module structure
 - Light-weight structure

eRD109

- Frontend ASICs
 - EICROC
 - FCFD
 - SCIPP (FAST, ASROC, HP-SoC)
- Frontend electronics
 - Low-mass flexible PCB

Project Engineering Design

- Mechanical engineering
 - Mech. support, integration
 - Cooling system
- Electric engineering
 - Clock distribution system
 - Streaming readout
 - Service hybrid

AC-LGAD R&D FY23 Deliverables

- Sensor prototype with 30 ps time and spatial resolution match RPs and Tracker;

FY23 Report and FY24 Proposal Writing

As discussed last week, I suggest that we follow the same procedure as last year, namely to use overleaf to collect all the inputs, and consolidate into a single document for our FY23 report and FY24 proposal. I have created an overleaf project. Below is the link for viewing

<https://www.overleaf.com/project/646c69b5b97ef76a1d135ed5>

If you would like to contribute to writing (e.g. what your group did in FY23, what you would propose to do in FY24 etc), please let me know your overleaf account. **Please complete the editing before June 20.**

P.S. our proposals from the last two years can be found at

<https://wiki.bnl.gov/conferences/index.php?title=Proposals>

Next R&D meeting tentatively on June 20. Please highlight FY23 progress and FY24 proposal of your group, as detailed in the overleaf document above, into a couple of slides. We shall go through them and discuss how to make a coherent report/proposal.

AC-LGAD Detectors for ePIC

Barrel TOF

Forward TOF

Roman Pots

	Area (m ²)	Channel size (mm ²)	# of Channels	Timing Resolution	Spatial resolution	Material budget
Barrel TOF	10	0.5*10	2.4M	30 ps	30 μm in $r \cdot \varphi$	0.01 X0
Forward TOF	2	0.5*0.5	8.8M	25 ps	30 μm in x and y	0.05 X0
B0 tracker	0.07	0.5*0.5	0.28M	30 ps	20 μm in x and y	0.01 X0
RPs/OMD	0.14/0.08	0.5*0.5	0.56M/0.32M	30 ps	140 μm in x and y	no strict req.

Requirements on timing and spatial resolutions and material budget are still being evaluated and are subject to change as the design matures, and we will continue to explore common designs for these detectors where possible to reduce cost and risk.

FY23 Resource Requests by eRD112

Vendor/ Institute	M&S Item	Cost per Item (k\$)	N. Items	Tot. Cost (k\$)
Sensor Production				175
BNL IO	Sensor fabrication (incl. labor)	50 (10 wafers)	1.5	75 → 75
HPK/FBK	Sensor fabrication	75+3-5/wafer	1	100 → 80
Sensor Characterization				13.7
UIC	M&S for test beam setup	-	-	5 → 5
LANL	M&S for irradiation test	-	-	5
SCIPP	Fermilab 16-channel boards	-	-	3.7
Sensor/ASIC Integration				30
UIC	Interposer fabrication and bump bonding	30	1	30
Mechanical Structure				15
NCKU	Material for light-weight support structure	-	-	10 → 10
Purdue	Material for light-weight support structure	-	-	5 → 5
Travel				21
BNL	Trips to Fermilab testbeam	2	2	4
UIC	Trips to Fermilab testbeam	1	5	5 → 5
ORNL	Trips to Fermilab testbeam	3	2	6
Rice	Trips to Fermilab testbeam	3	2	6
TOT.				254.7 → 180

Table 8: eRD112 resource request for M&S costs in FY23, excluding frontend ASIC and electronics.

FY23 Resource Requests by eRD112

Inst.	Task	Labor Type	FTE (%)	Tot. Cost (k\$)	
Sensor R&D				172.3	
BNL	Sensor+ASIC and test board assembly	El. Tech.	10	20	→ 20
UIC	Sensor+ASIC and test board assembly	El. Tech.	10	15	→ 15
	lab/beam test for sensors and ASICs	Research Sp.	50	45	
LANL	Sensor irradiation test	Scientist	2.5	10	
	Sensor irradiation test	Student	5	5	
Rice	pixel sensor test	Postdoc	40	40	
SCIPP	Oversight and coordination	Project Scientist	5	9	
	TCAD sim. and sensor design	El. Design Specialist	10	16.5	→ 5
	Prototype Assembly	EM Engineer	5	11.8	→ 10
Sensor/ASIC Integration				15	
UIC	interposer design and testing	El. Engineer	10	15	
Mechanical Structure				20	
NCKU	light-weight support structure R&D	Mech. Engineer	10	5	→ 5
Purdue	light-weight support structure R&D	Mech. Engineer	10	15	→ 15
TOT.				207.3	→ 70

Table 9: eRD112 budget request for labor costs in FY23, excluding frontend ASIC and electronics.

Upcoming Reviews

- **Preliminary Design Status Review ePIC PID detectors** **July 5-6, 2023**
- **DAC Meeting(s): R&D (2 days) and technical design review (2 days)** **Late Summer/Fall 2023 (TBD)**
- **Final Design Review for LLPs of Detector** **September 2023**
- **CD-3A Director's Review** **October 10-12, 2023**
- **DOE CD 3A OPA Review** **November 2023**
- **DOE CD 3A ESAAB Approval** **January 2024**
- **Final Design Reviews for all ePIC subsystems** **April – October 2024**
- **DOE CD 2/3 OPA Review and ICR** **January 2025 (TBC)**
- **DOE CD 2/3 ESAAB Approval** **April 2025**

AC-LGAD Sensor R&D

- Production of medium/large area sensors with different doping concentration, pitch and gap sizes between electrodes and Si thickness to optimize performance by BNL IO and HPK.
 - 1st BNL (06/2021-11/2021): 5-25 mm strips with 500 μm pitch, 100-300 μm electrode width, 50 μm active Si
 - 2nd BNL (06/2022-11/2022): 5-25 mm strips with 500-700 μm pitch, 50-100 μm electrode width, 20-50 μm Si
 - 3rd BNL (08/2022-12/2022): pixels with 500-700 μm pitch, various electrode shapes, 20-50 μm Si
 - 1st HPK (06/2022-04/2023): strip+pixel sensors with different electrode width, active thickness and n^+ doping
 - 4th BNL (02/2023-06/2023): deep gain layer to increase signal amplitudes

1st/2nd BNL Production

3rd BNL Production

Joint HPK Production

Frontend ASIC R&D

- **R&D Goals**

- 15-20 ps jitter with minimal (1 mW/ch) power consumption, match AC LGAD sensors for EIC

- **Plan**

- Continue the ASIC prototyping efforts and utilize the design and experience in ASICs for fast-timing detectors from ATLAS and CMS, and investigate common ASIC design and development for RP/B0 and ToF

EICROC by IJCLab/Omega/Irfu/AGH

- Preamp, discri. taken from ATLAS ALTIROC
- I2C slow control taken from CMS HGCROC
- TOA TDC adapted by IRFU Saclay
- ADC adapted to 8bits by AGH Krakow
- Digital readout: FIFO depth8 (200 ns)

FCFD by Fermilab

- Adapt the Constant Fraction Discriminator (CFD) principle in a pixel paired with a TDC, one time measurement gives the final answer.
- Charge injection consistent with simulations: ~30 ps at 5 fC, and <10 ps at 30 fC
- Tested with laser, beta source and beam

ASICs by SCIPP

Developer	ASIC	Technology
INFN Torino	FAST	110 nm CMOS
NALU Scientific	HPSoC	65 nm CMOS
Anadyne Inc	ASROC	Si-Ge BiCMOS

Meeting Agenda – 5/16/2023

eRD112/LGAD Consortium Meeting

Tuesday 16 May 2023, 09:00 → 13:15 US/Eastern

Alessandro Tricoli (Brookhaven National Lab), Wei Li (Rice University), Zhenyu Ye (University of Illinois at Chicago)

Description This is a joint meeting of the eRD112 and the LGAD Consortium

Zoom Meeting

<https://uic.zoom.us/j/82195681594?pwd=V3JXdHZQbE5vMVlKS045SHphSWdSdz09>

Meeting ID: 821 9568 1594

Passcode: eRD112LGAD

09:00 → 09:10 **News**

🕒 10m

Speakers: Alessandro Tricoli (Brookhaven National Lab), Wei Li (Rice University), Zhenyu Ye (University of Illinois at Chicago)

09:10 → 09:30 **Status and Plan on FCFD** ¶

🕒 20m

Speaker: Artur Apresyan (Fermi National Accelerator Laboratory)

09:30 → 09:50 **Report on Recent Sensor Beam Tests at Fermilab**

🕒 20m

Speaker: Irene Dutta (Fermi National Accelerator Laboratory)

09:50 → 10:20 **Report on Recent Sensor Test at UCSC**

🕒 30m

Speakers: Jennifer Ott (University of California, Santa Cruz (US)), Simone Mazza (University of California - Santa Cruz)

10:10 → 10:30 **Report on Recent Sensor Test at UIC**

🕒 20m

Speaker: Shirsendu Nanda (University of Illinois at Chicago)

Meeting Agenda – 6/6/2023

eRD112/LGAD Consortium Meeting

Tuesday 6 Jun 2023, 09:00 → 13:15 US/Eastern
