

pfRICH new name candidates

Kong Tu

BNL

June 1, 2023

Candidates (6 responses)

1. beRICH (backward endcap RICH)
2. nsRICH (negative-side RICH)
3. aRICH (aerogel RICH)
4. pRICH (proximity-focusing RICH, simpler than pfRICH)
5. beRICH or bRICH (Backwards (endcap) ring imaging Cherenkov)
6. TOFRICH (The detector is both a Time-of-Flight (TOF) detector as well as a RICH detector, hence the name TOFRICH)

Any other ideas are still welcome.

We may need help from the mini-charter to come up with a strategy to agree on something. Picking **the name could be the first of its task.**
