

PARALLELIZATION OF RAW DATA DECODING

Milan Stojanovic

06/29/2023

Overview

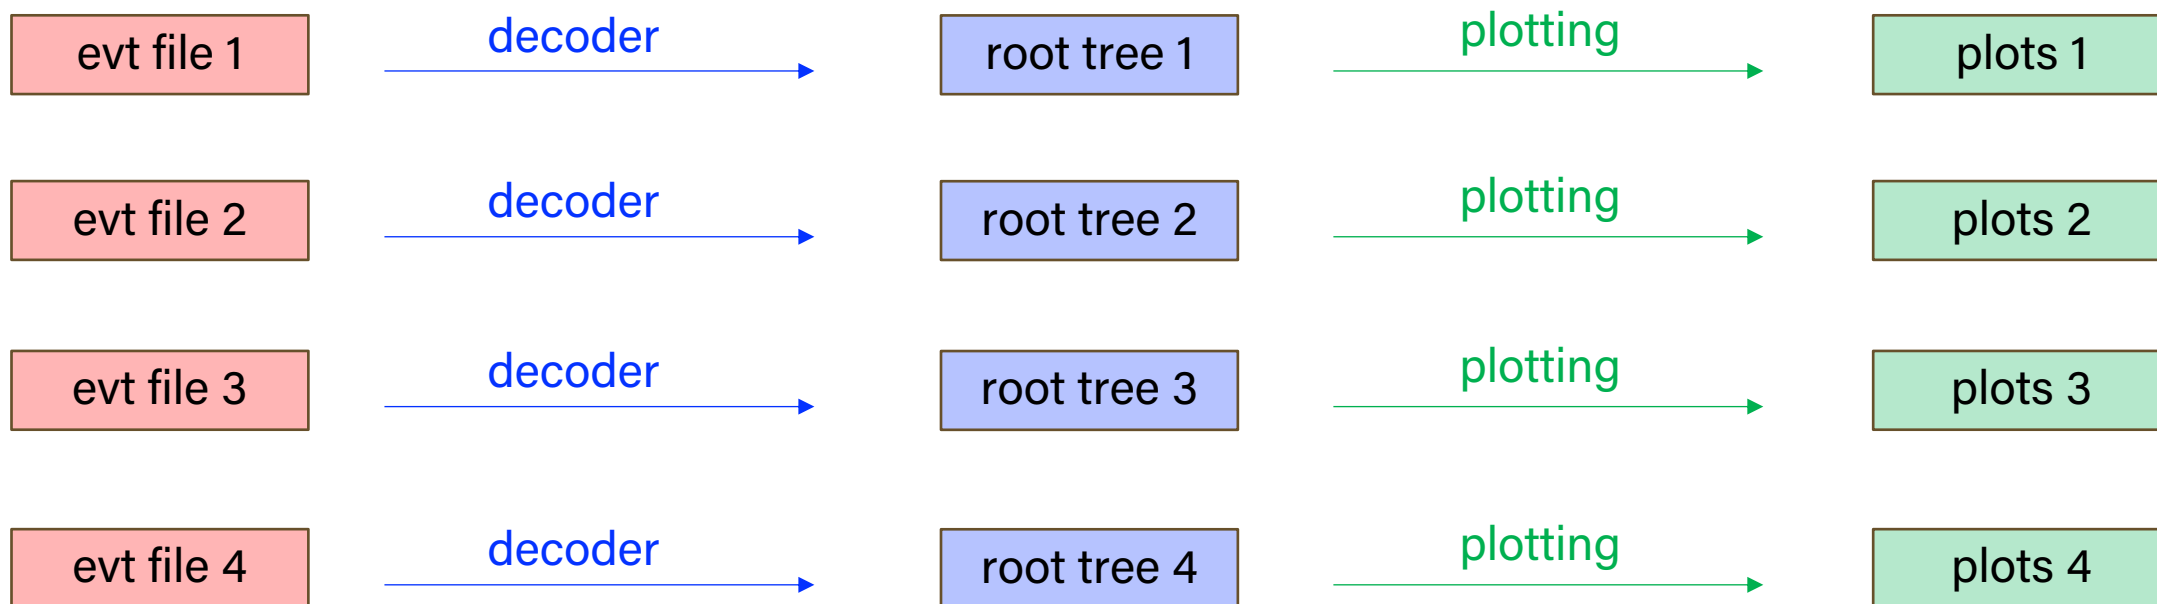

Current workflow:

Decoder: [/sphenix/tg/tg01/commissioning/INTT/work/jbertaux_sPHENIX_home/*](#)

Plots: [/sphenix/tg/tg01/commissioning/INTT/work/misaki/FelixQuickViewer_1Felix.C](#)

Overview

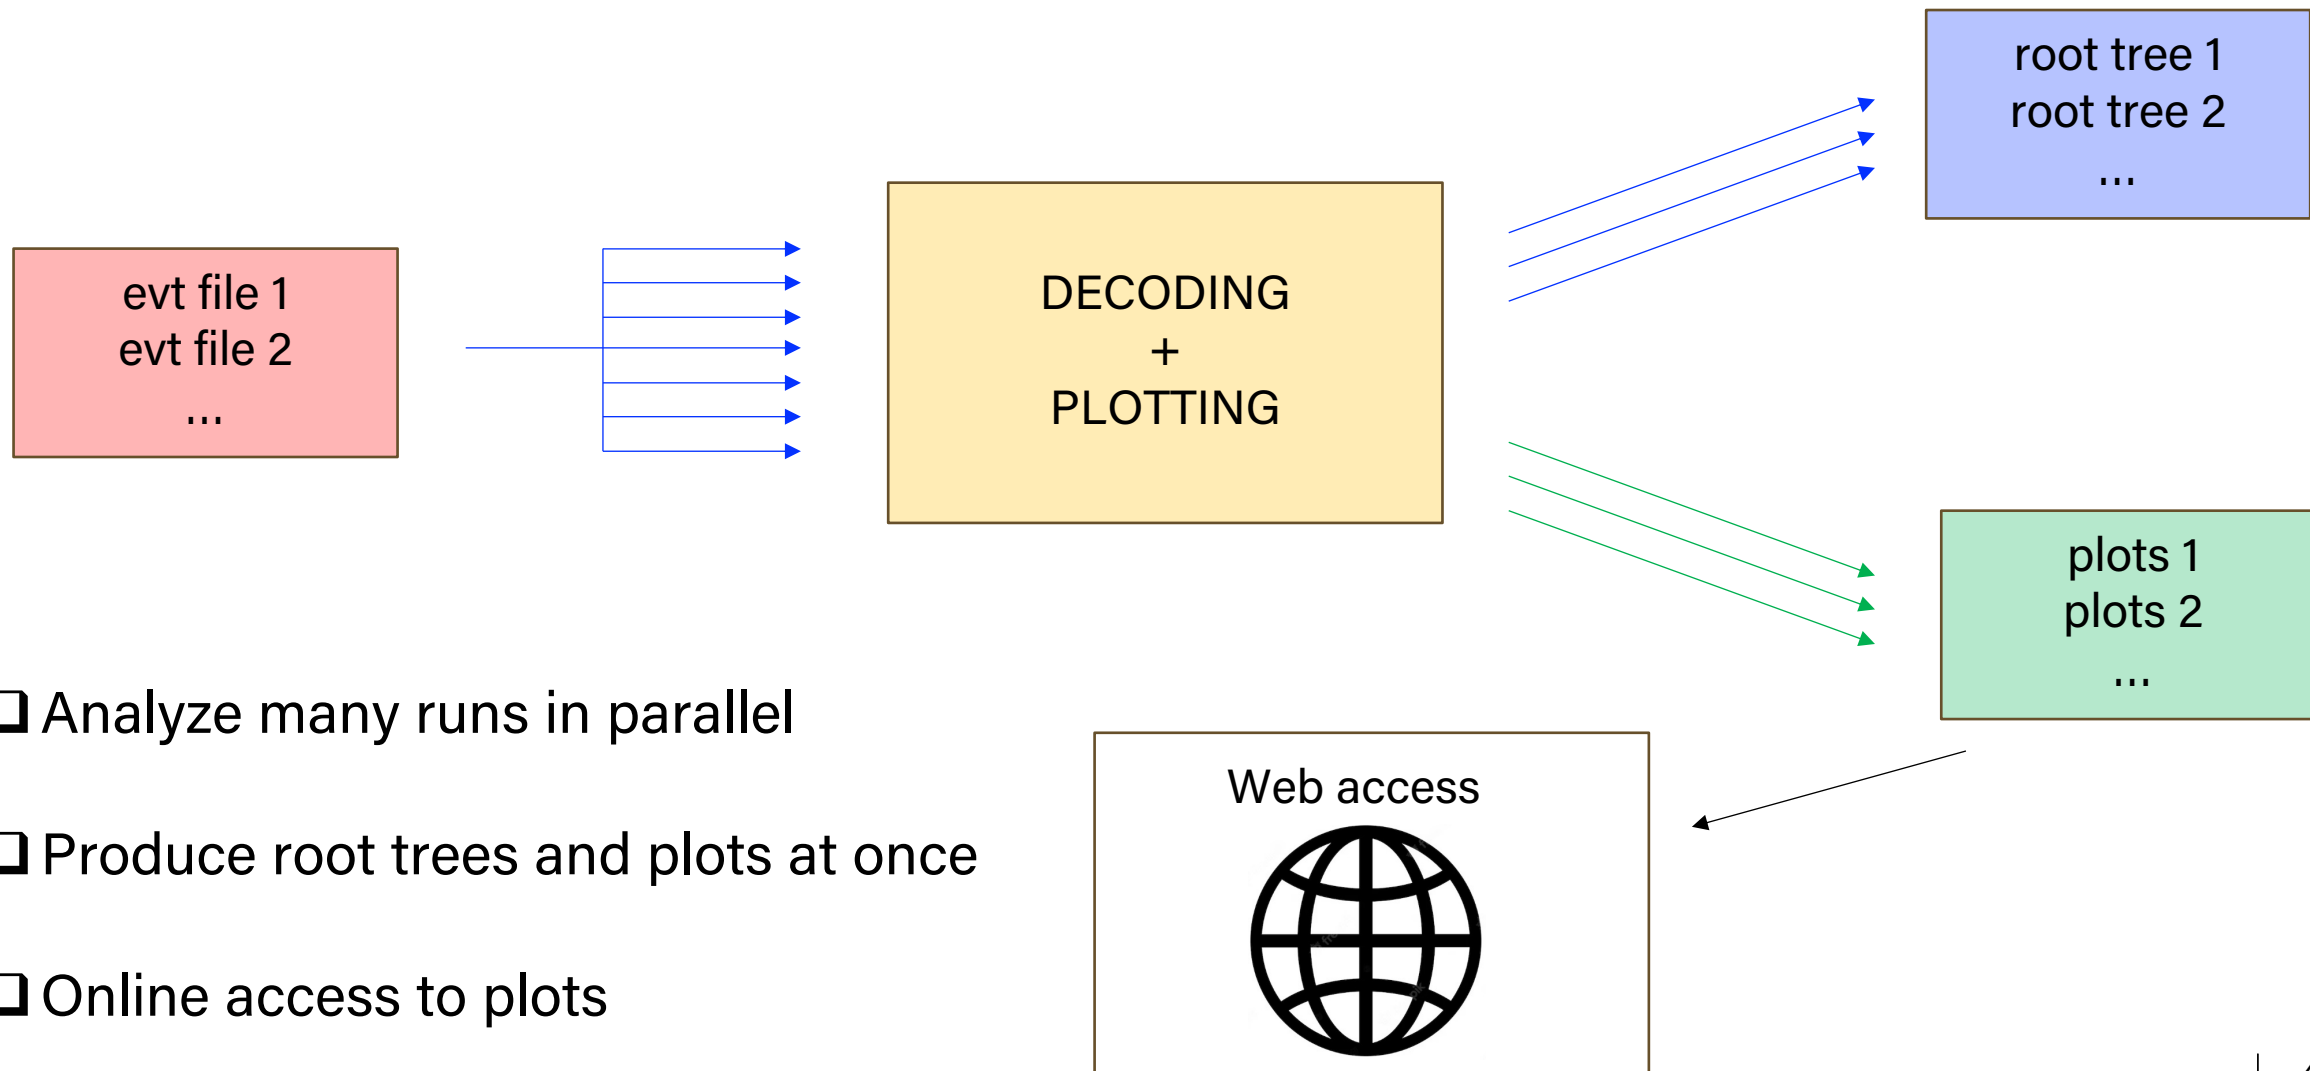

Current workflow:

Decoder: `/sphenix/tg/tg01/commissioning/INTT/work/jbertaux_sPHENIX_home/*`

Plots: `/sphenix/tg/tg01/commissioning/INTT/work/misaki/FelixQuickViewer_1Felix.C`

NEEDS TO BE DONE FOR EACH FILE SEPARATELY!

Parallelization

- ☐ Analyze many runs in parallel
- ☐ Produce root trees and plots at once
- ☐ Online access to plots

Parallelization

- ❑ Scripts:

`/sphenix/u/mstojano/rawdecoder/decoder_v2/`

- ❑ To produce root trees & plots:

`./executable.sh /path/to/the/input/file.evt`

- ❑ Running many files in parallel → Condor jobs

- Create list of input files you want to analyze

`infile1.list`

- Submit jobs:

`./submitjobs.sh`

Parallelization

- ❑ The script `submitjobs.sh` submits one job for one file
- ❑ The both root and plots are stored in the:
`/sphenix/tg/tg01/commissioning/INTT/root_files/` (~1500 jobs done so far)

- ❑ The condor submission script:

`start.sub` →

- “longlunch” = 2 hrs (max runtime)
- It can be increased if needed
- Err, out, and log files are all being stored in local submission folder

Needs to be changed!

```
executable = RawDataDecoder_v11.sh
arguments(Core) = $(Process)
error      = err.$(Process)
output     = out.$(Process)
log        = foo_$(Process).log
+JobFlavour = "longlunch"
```

- ❑ If you want to run several files at once, but locally:
`./RawDataDecoder_v10.sh`

Online access

- ❑ The web page: <https://sphenix-intra.sdcc.bnl.gov/WWW/subsystem/intt/>
- ❑ Original plots location is not on server.
 - Currently I move them manually
- ❑ There will be many plots
 - ❑ Classification probably needs to re-established

To do

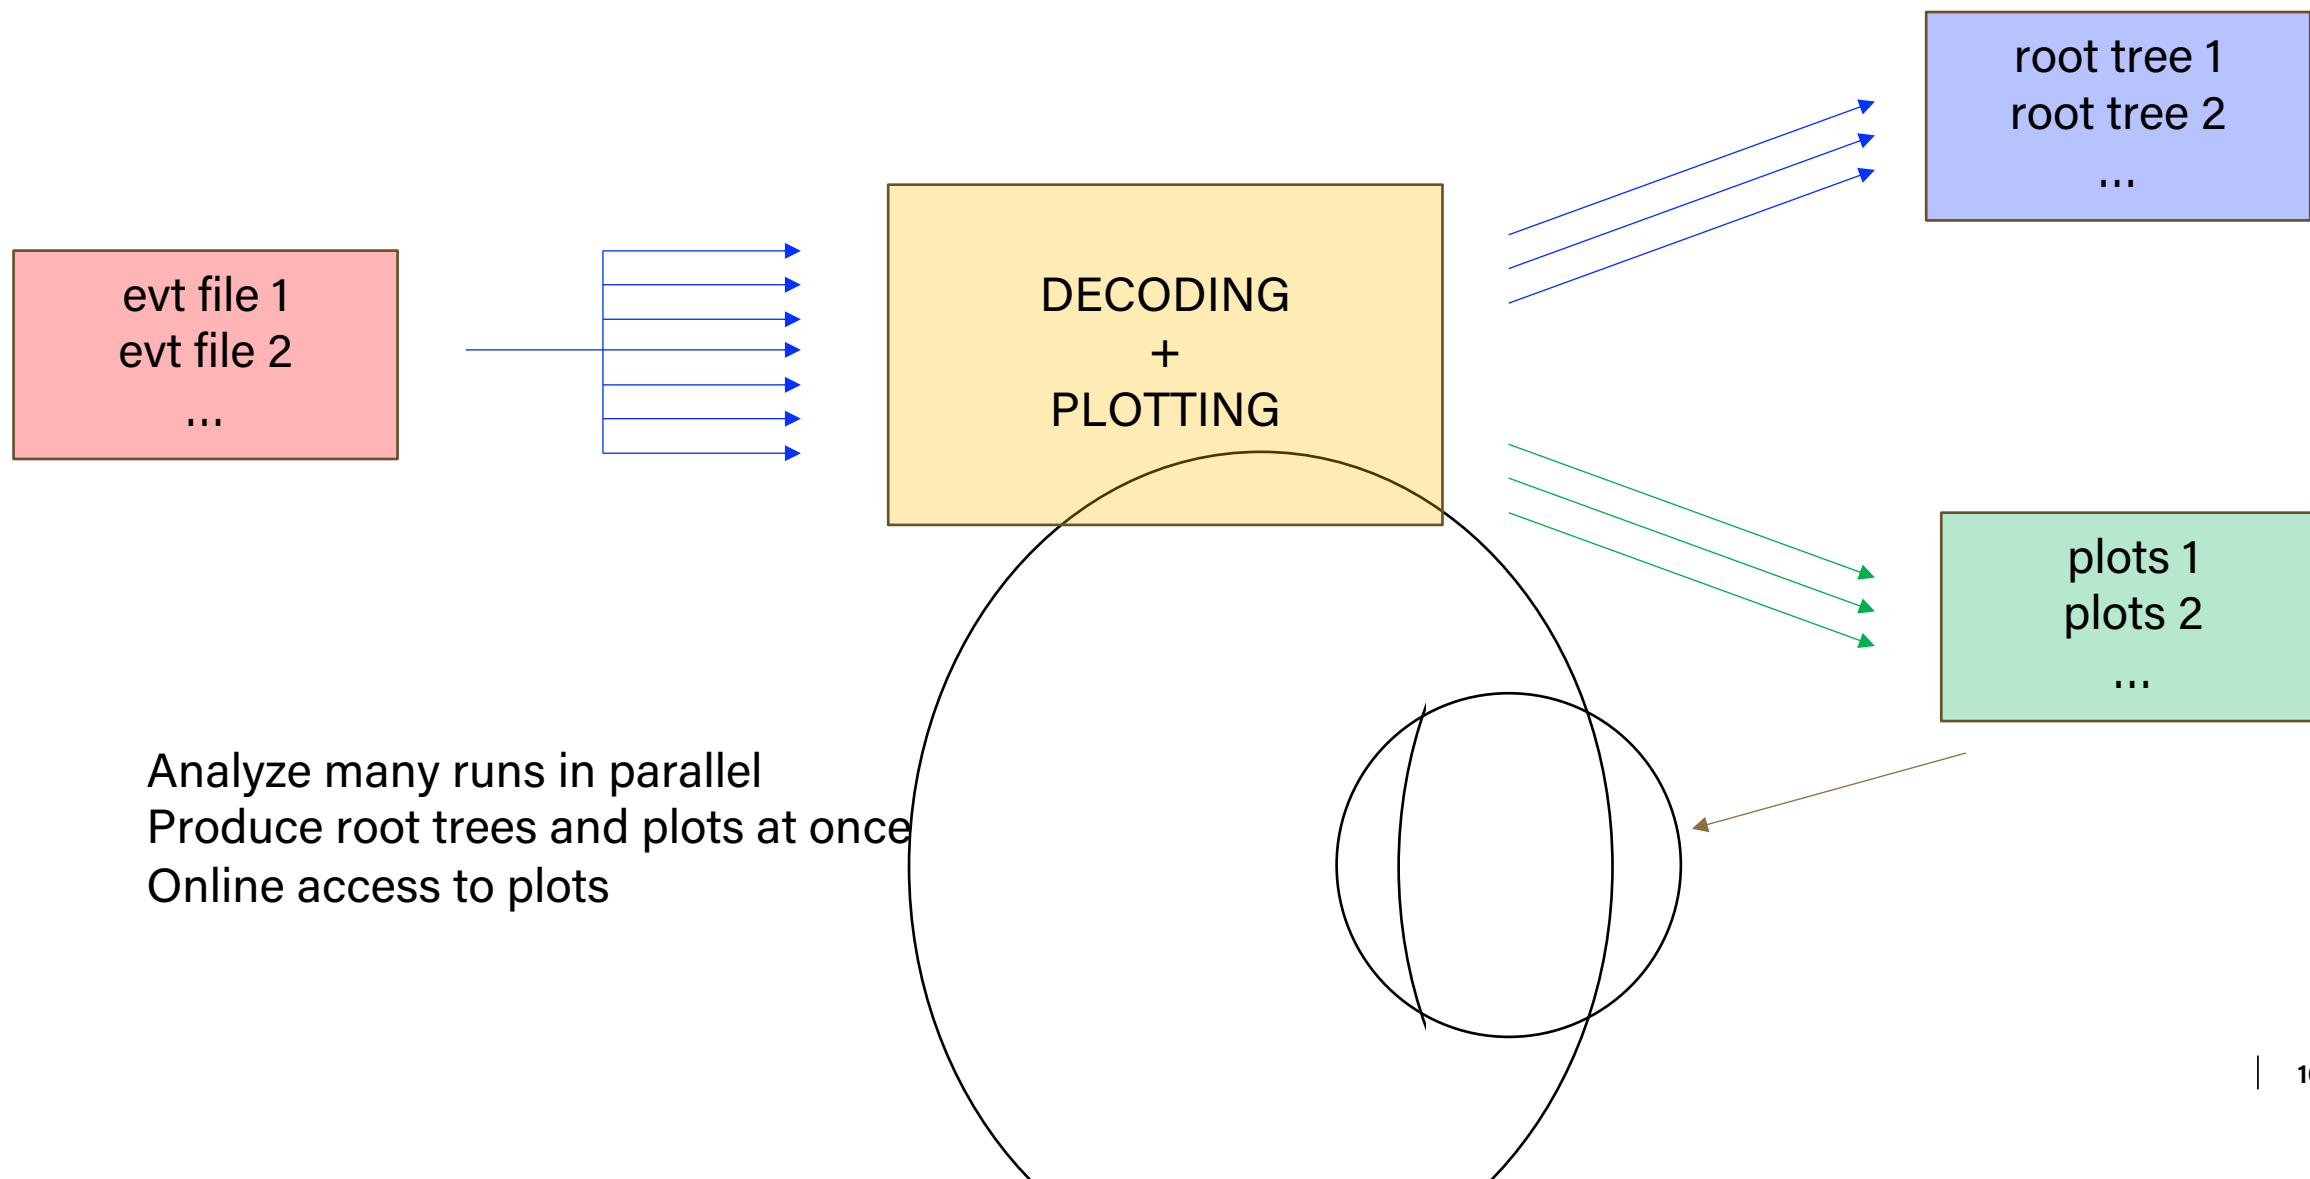

- ☐ Polishing the codes
- ☐ Macros name conventions
- ☐ Classification of the files
- ☐ More/less automation?

Web access

❑ S

❑ The script `submitjobs.sh` submits one job for one file

GOAL: PARALELIZATION

CAD entries from 2021

- ❑ HIN-21-003 [$b \rightarrow D0$ vn in PbPb] – Referee comments
- ❑ HIN-21-006 [V0 femtoscopy in PbPb] – Referee comments
- ❑ HIN-21-010 [$v_2\{2k\}(k=1,\dots,5)$] – CWR ended
- ❑ HIN-21-011 [HBT correlations in PbPb] – **Ready for submission**
- ❑ HIN-21-012 [$cn\{m\}$ - $\langle p_T \rangle$ correlations] – CWR ended
- ❑ HIN-21-013 [2pc in pp jets] – **Approved**
- ❑ HIN-21-017 [Charge balance function] –FR hw

NEW CADI

- ☐ **HIN-22-005 [net charge fluctuations] – approved**
- ☐ **HIN-23-002 [cumulants in pP] – pre-approved**
- ☐ **HIN-23-003 [speed of sound in UCC] – pre-approval comments**
- ☐ **HIN-23-005 [vn up to v10] – freezing this week?**

PAG news

QM23 abstracts

- 1) Strange hadron collectivity and femtoscopic correlations in pPb collisions at 8.16 TeV with the CMS experiment, REJECTED
→ POSTER ?
- 2) Elliptic anisotropy measurement of the $f_0(980)$ in pPb collisions and determination of its quark content by CMS, ACCEPTED
- 3) Search for long-range QCD collective phenomena inside high-multiplicity jets in pp collisions with the CMS experiment, ACCEPTED
- 4) Probing the dynamical evolution of QGP using charge-dependent correlations and fluctuations at CMS, REJECTED
→ POSTER?
- 5) Study of Jets and Jet Medium interaction using two-particle correlations, REJECTED
→ DROPPED
- 6) K^0_S and Λ ($\bar{\Lambda}$) two-particle femtoscopic correlations in PbPb collisions with the CMS experiment, REJECTED
→ POSTER
- 7) Measurement of azimuthal anisotropy at high p_{T} using subevent cumulants in pPb collisions at CMS, REJECTED
→ MERGED with jet suppression in pPb
- 8) Measuring flow harmonics up to order 10 and multiparticle correlations in PbPb collisions with the CMS experiment, ACCEPTED
- 9) Extracting the speed of sound in the strongly-interacting matter created in relativistic nuclear collisions with the CMS experiment, ACCEPTED
- 10) Flow harmonic measurements up to order 10 in PbPb collisions with CMS (POSTER)

BACKUP SLIDES

1) Conferences

❑ HIN Workshop

- Trento, Italy, May 29-Jun 1, Hybrid
- Registration : [link](#)

❑ Initial stages

- June 19-23

❑ Quark Matter

- Houston TX, USA, September 3-9
- Abstract submission summary
 - 9 talk abstracts submitted
 - 1 poster abstract
 - +1 abstract in spectra group (Test data analysis, $v_n + dN/d\eta$)

❑ International Symposium on Multiparticle Dynamics

- Hungary, 21-25 Aug
- Early registration deadline May 31
- Abstract deadline: June 30

❑ EPS-HEP2023

- Aug 21-25
- Early registration deadline May 30
- Abstract deadline May 21

2) Run 1&2 Review Paper

- ❑ Possibility to submit a few review papers of O(100) pages in Phys. Rep. (2021 IF of 30)
- ❑ Subject: CMS Runs 1&2 results with an eye on Run 3&beyond
- ❑ First draft by May 19th
- ❑ Similar reports: [link](#)

2) HIN WS talks (speakers needed)

- ❑ 25 mins - New insights from flow-related analyses in large collision systems
- ❑ 25 mins - Interesting new flow analyses in small systems
- ❑ 10 mins - Enhancing technical consistency in flow analysis
- ❑ 30 mins - Physics questions for run 3 and discussions

1) New meeting time

- ☐ 3pm GVA time
- ☐ or: 8pm central time

2) Run 1&2 Review Paper

- ☐ Possibility to submit a few review papers of O(100) pages in Phys. Rep. (2021 IF of 30)
- ☐ Subject: CMS Runs 1&2 results with an eye on Run 3&beyond
- ☐ Please contact us if you are willing to contribute
- ☐ Similar reports: [link](#)

3) HI Run(s)

- ☐ pp ref starts on September 21st
 - ☐ 5 days of pp collisions

- ☐ PbPb starts on October 2nd
 - ☐ 27 days of PbPb collisions
 - ☐ Energy still TBD

- ☐ What about pPb
 - ☐ In Run3 (2024) or Run4?

- ☐ OO/pO collisions
 - ☐ 2024, not in HIN run time
 - ☐ Do we need pp reference?
