INTT Standalone Consistency Checks

RIKEN/RBRC

Itaru Nakagawa

Consistency Checks

- MIP observation: DAC scan

- Expected track multiplicity vs observed one

- Correlation between different detectors
  - Multiplicity correlation btwn INTT vs. MBD, TPOD, MVTX, TPC, EMCal, HCal···

- INTT standalone tracking reconstruction
  - z-distribution, z-vtx_INTT vs z-vtx_MBD
  - hit position prediction at MVTX
  - Extrapolation to larger r -> hit prediction with EMCal and Hcal

- And more ..
