

Status of commissioning data processes

Genki

Data

- Martin reported that the structure of the buffer box was changed in the shift change meeting on Sep/.

Data paths

	Path
Evt in bbox	BEFORE: /bbox/commissioning/INTT AFTER : /bbox/bbox[0-5]/INTT
ROOT files in bbox	BEFORE: /bbox/commissioning/INTT/commissioning/hit_files AFTER : nowhere <small>(the link above was deleted by Martin. I made it again, but it' s better not to rely on it.)</small>
Evt in SDCC	BEFORE: /sphenix/lustre01/sphnxpro/commissioning/INTT AFTER : /sphenix/lustre01/sphnxpro/bbox[0-5]/INTT
ROOT files in SDCC	BEFORE: /sphenix/tg/tg01/commissioning/INTT/root_files AFTER : /sphenix/tg/tg01/commissioning/INTT/root_files
Merged ROOT files in SDCC	BEFORE: /sphenix/tg/tg01/commissioning/INTT/merged_root_files AFTER : /sphenix/tg/tg01/commissioning/INTT/merged_root_files

Data processes

I counted the number of files in the buffer box. Some may be moved to HPSS and no longer in the buffer box.

	All evt	ROOT files in 1008	Evt in SDCC	ROOT files in SDCC	Event-base ROOT files in SDCC	Merged event-base ROOT files in SDCC
Beam	? How can I check HPSS?	7116?	12995	6704	6675	32 (6675/8~784)
Cosmics	4988	2663? Most of them gone to HPSS?	4988	5025	4895	611 (4895/8~612)
Pedestal	70		70	40	40	0
Junk	196		194	144	144	0
Calib	705		704	?	?	0

Most of the cosmic ray runs were processed in SDCC. Some more work is needed to complete all runs.
