

- On the track to reach the physics goal with low-luminosity by 8am of 5/15
- Request for special runs
 - High luminosity trigger and local polarimetry commissioning, 1/2 fill (4 hrs): This Friday?
 - no crossing angle, no leveling
 - Alignment for Forward Detectors 1 fill (8 hrs)
 - STAR magnet off, 56 bunches, no crossing angle, level at BBC~10kHz
 - Forward min-bias cross-section measurement 1/2 fill (4 hrs)
 - 28 bunches, no crossing angle, level at BBC~10kHz
 - Vernier scans at the beginning and end
